

Supported acquirers

Below is a list of supported acquirers and features for major card brands, gift cards, and Advanced Payment Methods (APMs).

In the Production environment, the settlement will take place according to a fixed scheduled time per acquirer (usually this happens at the end of the day). Check the contract with your acquirer for settlement period details.

***Scheme Reference:** It is sent by the acquirer in the authorization response message, and sent in subsequent authorization request messages associated with the same transaction, e.g. incremental authorizations. The value returned shall also subsequently be included in the settlement data required for the authorization (or authorizations). The Scheme reference data therefore allows the card issuer to match settlement data to the associated authorization message(s).

Barclays

Sandbox

- **Countries / Regions:** UK, IrelandProduction
