

PayPal Create billing agreement

Overview

Creating a billing agreement using a token, that was created in [Initiate Billing Agreement API](#).

Required fields

- billingToken - PayPal agreement token that was created in Initiate billing agreement
- ppcUid - PayPal Payment Provider Contract UUID

Here is an example of request that can be used for creating a billing agreement.

```
curl -v -X POST '<SERVER URL>/billingAgreement/create' \  
-H 'Authorization: Bearer <Access Token>' \  
-H 'Content-Type: application/json' \  
-d '{  
  "billingToken": "BA-7P980893LY950894R",  
  "paymentProviderContract": "<PPC ID>"  
}'
```

Response code example

```
{  
  "agreementId": "B-1WW844616B620123"  
}
```

Response Fields:

- agreementId - The billing agreement ID that should be sent for authorizing and capturing the funds.

Note: This agreement ID should be saved by the merchant on their server, so that they can send it for authorizing and capturing the transactions.
