

Customize a report template

Overview

This feature enables you to customize the content by selecting the transaction details you need, and the access to the report within your organization. You can create new report templates for exporting the report to best suit your business needs.

Access

Your level of access determines if you can create and edit a new template.

Access:

- Merchant Admin

No access:

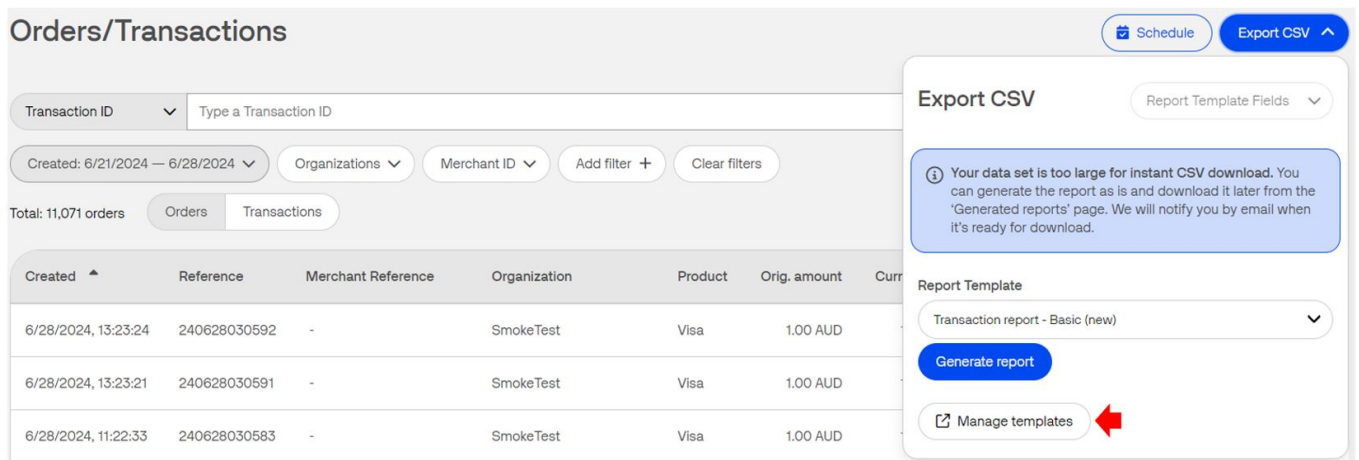

- Every other user roles

All users, except those with Merchant External Partner, Reseller Manager (MOP) and Reseller Representative (MOP) roles, can download the customized CSV report.

Creating a report template

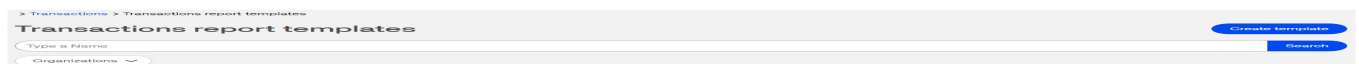

To create a new report template, follow these steps:

1. Navigate to *Commerce* and select **Orders / Transactions** from the *Reporting* section.
2. Select the needed view between orders and transactions, by clicking on the toggle button **Orders / Transactions**.
3. After adding the filters for the details that you need included in the report, click on **Export CSV**.
4. In the *Export CSV* pop-up dialogue box, click on **Manage templates**.

The screenshot shows the 'Orders/Transactions' report page. At the top right, there are 'Schedule' and 'Export CSV' buttons. The 'Export CSV' dialog is open, displaying a message: 'Your data set is too large for instant CSV download. You can generate the report as is and download it later from the 'Generated reports' page. We will notify you by email when it's ready for download.' Below this message, there is a 'Report Template' dropdown menu set to 'Transaction report - Basic (new)', a 'Generate report' button, and a 'Manage templates' button with a red arrow pointing to it.

5. In the *Transactions report templates* page, click on the **Create template** button on the right-hand side of the screen.

The screenshot shows the 'Transactions report templates' page. At the top right, there is a 'Create template' button highlighted in blue.

6. In the *Add template* form fill in and select all needed details.

- In the **Report Template Name** field, type the name of the new report template.
- In the **Organization** field select your organization from the drop-down menu. You can allow users from your organization and attached sub-organizations to use the template by clicking on the **Share to all sub-organizations** checkbox.
- In the **Report Content** section you can either select all the available transaction fields by clicking on the **Select all fields** checkbox or you can select only the fields you need by clicking on their respective checkbox from the list of 100 different transaction fields. With every selected checkbox from the list the counter next to the *Select all fields* checkbox increases, informing of the number of details you have selected so far. For information on each field, see [Reporting details](#).

> Transactions > Transactions report templates > Add template

Add template

General Information

Report Template Name

Identifier for exports and scheduling reports

Organization

Share to all sub-organisations

All users assigned to this organisation are eligible to use this report template

Report Content

Select all fields 0/137 fields selected

Organization name
Organization_name

Issuer instalment amount
Issuer_instalment_amount

Organization ID
Internal_organization_ID

Issuer instalments number
Issuer_instalments_count

Processor card brand
Processor_card_brand

Creation date and time
Created_datetime

Processor acquirer name

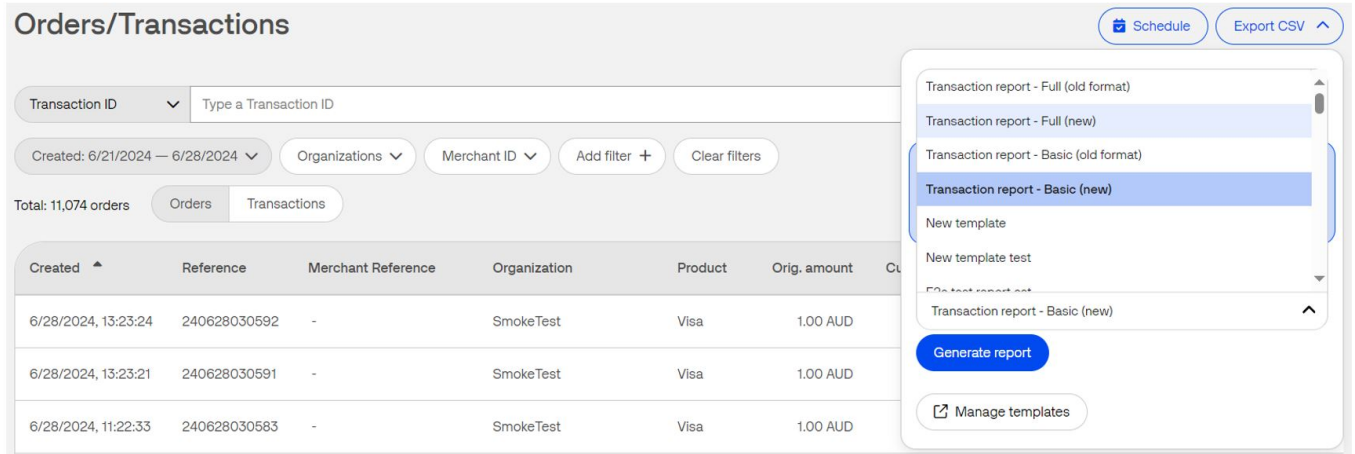

Processor issuer name

7. Once you have chosen the details you need included in the report, click on **Save template**.

Updated: 02-Jul-2024

8. The new template will now be available to use from the **Report template** drop-down list in the *Export CSV* pop-up menu each time you need to export a report.

The screenshot shows the 'Orders/Transactions' interface. At the top right, there are 'Schedule' and 'Export CSV' buttons. Below the search bar, there are filters for 'Created: 6/21/2024 - 6/28/2024', 'Organizations', and 'Merchant ID'. A table shows transaction data with columns: Created, Reference, Merchant Reference, Organization, Product, and Orig. amount. A dropdown menu is open over the 'Export CSV' button, listing report templates: 'Transaction report - Full (old format)', 'Transaction report - Full (new)', 'Transaction report - Basic (old format)', 'Transaction report - Basic (new)', 'New template', 'New template test', and 'Transaction report - Basic (new)'. A 'Generate report' button is at the bottom of the dropdown, and a 'Manage templates' link is below it.

9. You can also edit existing templates if you have a **Merchant Admin** role in your organization.
