

If you don't have a Verifone account click on **I don't have a Verifone account**, and you will be redirected to the Sales team.

For more information on fields click on the tooltip "i" icon.

Enter the *User ID* and *API Key*, then press on **Continue**. Wait until a success or error message is displayed.

You can use a Verifone test mode environment to test your integration by clicking on the **Sandbox** option (for this, you will need to have an account set up in the test environment). If the *Sandbox* option is selected, you will need to use the information from your test account (user ID, API key).

If you wish to change the integration environment, you will need to return to this page by clicking the **Manage** button on the app in your Shopify admin, then **Auto Setup Tool** and update the API Key and User ID associated with the Verifone Account with the ones corresponding to the selected environment.

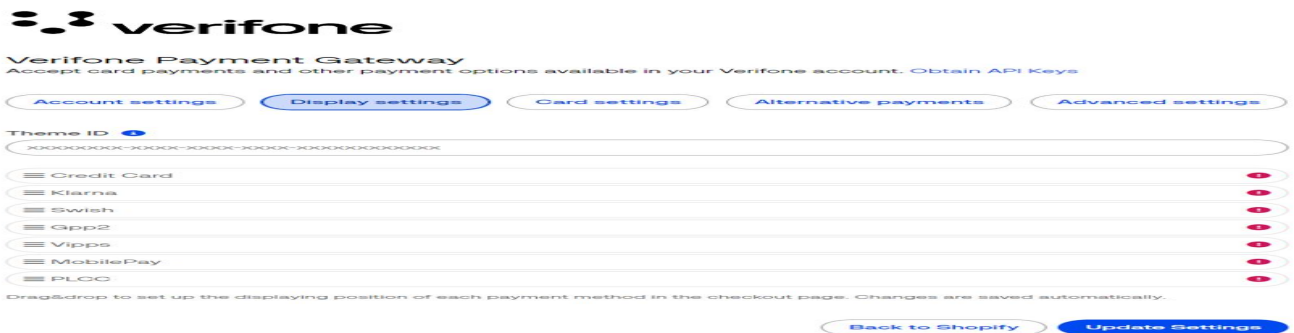

- **API Key:** The value of the [API Key](#) you created in [Verifone Central](#), under the user icon > *API keys* > *Create API key*.
- **User ID:** The ID of the user that generated the API key in Verifone Central. You can find this information in your Verifone Central account, under *Profile* → *API Keys*.

2. If the successful message displays, then the configuration is done. We recommend checking all tabs to verify all expected payment methods are enabled and clicking a final time on **Update settings**.

3. Two failed messages can be displayed:

- **Invalid credentials. Make sure you enter right credential/environment and try again!:** You must check if both the API Key and User ID are correctly entered, and the environment is properly chosen.
- **Account could not be auto-configured, manual configuration is required:** Follow the steps from the [Manual setup](#) documentation. If you are unsure what is your environment, contact your Verifone representative.

(Optional) Display settings

For more information on how to setup the display and theme of the checkout page see **Manual Setup** > [Display settings](#).

(Optional) Advanced settings

Verifone Payment Gateway

Accept card payments and other payment options available in your Verifone account. [Obtain API Keys](#)

Transaction type ⓘ

For more information on how to configure advanced settings see **Manual Setup** > [Advanced settings](#).

Your account setup is functionally complete, and you can click on **Back to Shopify** to continue plugin activation.

- 4. Select the credit card brands allowed on your Verifone account and click the **Activate Verifone Checkout** button.

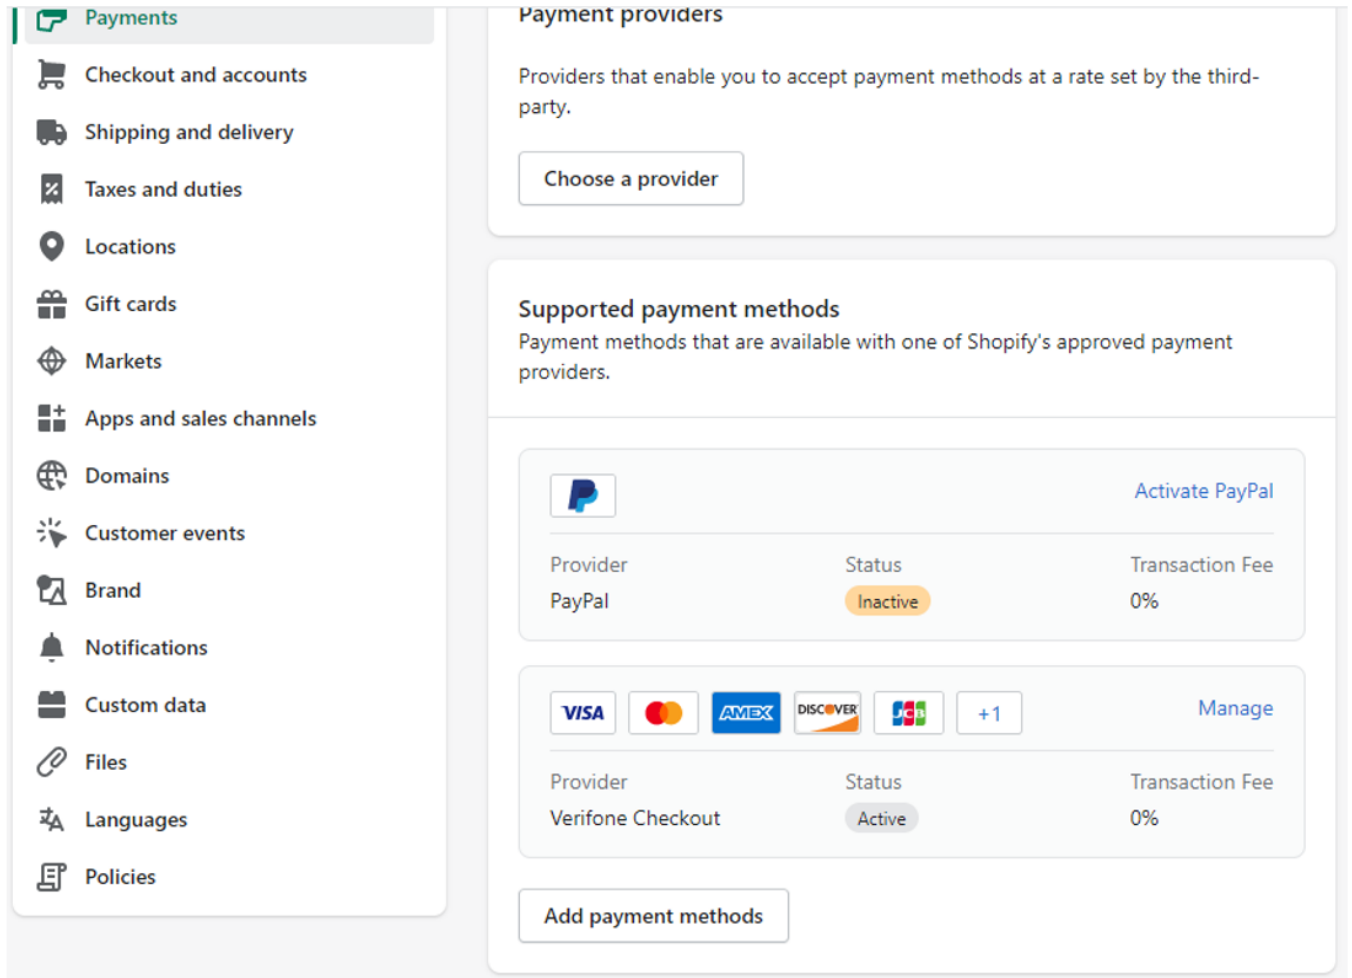

Test mode box: If you have enabled test mode in the previous [Account settings](#) step, make sure to also enable it on this page so that both your Verifone settings as well as Shopify Store are running in test mode.

The selected card brands will be displayed to your customers as available in Verifone Checkout but selecting a specific card brand will not make that brand available in the checkout. The brand available in the checkout are the ones setup on your Payment provider contract (PPC).

Shopify Settings

1. The Verifone Checkout provider will be displayed in the *Supported Payment Methods* box.

The screenshot shows the Shopify Payments settings interface. On the left is a navigation menu with 'Payments' selected. The main content area is divided into three sections:

- Payment providers:** A box with the text 'Providers that enable you to accept payment methods at a rate set by the third-party.' and a 'Choose a provider' button.
- Supported payment methods:** A box with the text 'Payment methods that are available with one of Shopify's approved payment providers.' containing two tables.

Provider	Status	Transaction Fee
PayPal	Inactive	0%
Verifone Checkout	Active	0%
- Bottom:** An 'Add payment methods' button.

2. In the *Payments* box, select **Manage** and then choose one of the following options:
 - **Automatically** capture payment for orders - if the **Sale** transaction type was selected when [setting up your payment method](#), at configuration.
 - **Manually** capture payment for orders - if the **Preauth / Auth** transaction type was selected when [setting up your payment method](#), at configuration.

3. Click on *Checkout* in the navigation menu and select **Require first and last name** for the **Full name** option. Click on **Save** to apply your options.
