

## CardAcquisitionReference.java

```
class CardAcquisitionReference
```

- Reference to card data that has been previously acquired by the terminal, either through requestCardData call or processed Payment. Can be utilized to construct CardInformation object for subsequent operations without requiring customer to present the card again to the terminal.

```
reference(String id, String timestamp)
```

```
inline String getId()
```

```
inline String getTimestamp()
```

```
position on the terminal
```

```
inline String toString()
```

```
res
```

```
final String mTimestamp
```
