

## CardAcquisitionReference.hpp

```
struct CardAcquisitionReference
```

- Reference to card data that has been previously acquired by the terminal, either through requestCardData call or processed Payment. Can be utilized to construct CardInformation object for subsequent operations without requiring customer to present the card again to the terminal.

```
inline CardAcquisitionReference(std::optional<std::string> id_, std::optional<std::string> timestamp_)
```

```
std::optional<std::string> id
```

```
std::optional<std::string> timestamp
```

- Date and time of card acquisition on the terminal
