

CardEncryptionType.hpp

```
namespace verifone_sdk
```

```
enum class CardEncryptionType : int
```

```
enumerator VCL
```

```
    for card details
```

```
enumerator ADE
```

```
    for card details
```

```
enumerator PKI
```

- PKI encryption used for card details

```
constexpr std::string_view toString(const CardEncryptionType &arg)
```
