

## FallbackReason.hpp

```
namespace verifone_sdk
```

```
enum class FallbackReason : int
```

```
enumerator UNSPECIFIED
```

```
enumerator CHIP_CANNOT_BE_READ
```

read so fallback to MSR is requested

```
enumerator CHIP_EMPTY_CANDIDATE_LIST
```

- Card was inserted with a CHIP which has no mutually supported applications with the terminal

```
constexpr std::string_view toString(const FallbackReason &arg)
```
