

## ReceiptSection.hpp

```
namespace verifone_sdk
```

```
enum class ReceiptSection : int
```

```
enumerator HTML_HEAD
```

HTML head section, useful for configuring CSS styles and similar information

```
enumerator BEFORE_GREETING
```

Text appearing before the business information

```
enumerator AFTER_GREETING
```

Text appearing after the business information

```
enumerator BEFORE_TRANSACTION
```

Text appearing before the cashier name

```
enumerator AFTER_TRANSACTION
```

Text appearing after the cashier name

```
enumerator BEFORE_CUSTOM_FOOTER
```

Text appearing before the custom mFooter

```
enumerator AFTER_CUSTOM_FOOTER
```

- The section after the custom mFooter but before any final mFooter text, such as final legal disclaimers

```
constexpr std::string_view toString(const ReceiptSection &arg)
```
