## CardAcquisitionReference.doxydoc

class CardAcquisitionReference

- Reference to card data that has been previously acquired by the terminal, either through requestCardData call or processed Payment.
- Can be utilized to construct CardInformation object for subsequent operations without requireing customer to present the card again to the terminal.

inline CardAcquisitionReference(System::String *id, System::String *timestamp)

- Creates a new CardAcquisitionReference.

const System::String *Id

const System::String *Timestamp

- Date and time of card acquisition on the terminal.
