Updated: 14-Apr-2025

Automatic Setup

After [installing the app](#), you need to configure the correct credentials that will associate it to your Verifone account.

1. On the WooCommerce dashboard, navigate to *WooCommerce ? Settings* and click on **Payments**.

WordPress dashboard header: My Sites, live, 12, 0, + New

Left sidebar menu:

 - NS Cloner
 - Loco Translate

Main content area: Payments

Payment methods tabs: General, Products, Shipping, **Payments**, Accounts & Privacy, Emails

PayPal Checkout is almost ready. To get started, [connect your account](#).

Payment methods

Installed payment methods are listed below and can be sorted to control their display order on the front end.

| Method |
|---|
|  WooCommerce Payments |
|  Verifone Hosted Cart – Verifone |
|  Direct bank transfer |
|  Check payments |
|  Cash on delivery – Card Payments |
|  2Checkout Convert Plus Payment Gateway |
|  2Checkout Inline Payment Gateway |

2. In the *Payments* tab, click on **Verifone Hosted Cart**.

WordPress 10 0 + New

Payments

popular payment methods.

By clicking "Install", you agree to the [Terms of Service](#) and [Privacy policy](#).

| | | | |
|-------|---|-------------------------------------|--|
| ☰ ^ ▼ | Direct bank transfer | <input type="checkbox"/> | Take payments in person via BACS. More commonly known as direct bank/wire transfer. |
| ☰ ^ ▼ | Check payments | <input type="checkbox"/> | Take payments in person via checks. This offline gateway can also be useful to test purchases. |
| ☰ ^ ▼ | Cash on delivery | <input type="checkbox"/> | Have your customers pay with cash (or by other means) upon delivery. |
| ☰ ^ ▼ | Verifone Hosted Cart | <input checked="" type="checkbox"/> | Card payments and alternative payment methods powered by Verifone |
| ☰ ^ ▼ | 2Checkout Convert Plus Payment Gateway | <input type="checkbox"/> | 2Checkout secured card payments with Buy Links. |
| ☰ ^ ▼ | 2Checkout Inline Payment Gateway | <input type="checkbox"/> | Secured 2Checkout Inline payments without redirects |
| ☰ ^ ▼ | 2Checkout 2Pay Api | <input type="checkbox"/> | Secured 2Checkout card payments over API. |
| ☰ ^ ▼ | PayPal | <input type="checkbox"/> | Accept PayPal, Pay Later and alternative payment types. |

3. The configuration page should look like the one displayed below.

Plugin Setup

The **Auto Setup Tool** pop-up will be displayed automatically, if this is your first time trying to configure the Verifone settings. If you already did the configuration, you can always access the tool as indicated below:

Account settings

Enter the below information, to configure your **Verifone account settings**.

The screenshot shows a modal window titled "Auto Setup Tool" with a close button (X) in the top right corner. Below the title, a message states: "This tool will attempt to configure your Verifone account settings. Please input the necessary information below. [Obtain API Keys](#)".

There are two toggle buttons: "Production" (light blue) and "Sandbox" (dark blue). The "Sandbox" button is currently selected.

Below the toggles are three input fields:

- User ID:** A text input field containing the value "b9b3bd52-██-██-██-██".
- API Key:** A text input field containing the value "mtBtnFCMY██".
- Region:** A dropdown menu showing "EMEA (Europe, Middle East & Africa)" with a downward arrow.

At the bottom left is a "Cancel" button, and at the bottom right is a "Continue" button.

Below the "Continue" button, a red warning message reads: "Clicking Continue will override your current settings".

- Enter the *User ID* and *API Key*, then press on **Continue**. Wait until a success or error message is displayed.

You can use a Verifone test mode environment to test your integration by clicking on the **Sandbox** option (for this, you will need to have an account set up in the test environment). If the Sandbox option is selected, you will need to use the information from your test account (user ID, API key). If you wish to change the integration environment, you will need to return to this page by clicking the **Manage** button on the app in your WooCommerce admin, then **Auto Setup Tool** and update the API Key and User ID associated with the Verifone Account with the ones corresponding to the selected environment.

- **User ID:** The ID of the user that generated the [API key](#) in [Verifone Central](#). You can find this information in your Verifone Central account, under *Profile ? API Keys*.
 - **API Key:** The value of the API Key you created in Verifone Central, under the user icon > *API keys > Create API key*.
 - **Region:** The region in which your Verifone account is created. Check your Verifone Central access URL if in doubt.
- If the successful message displays, then the configuration is done. We recommend checking all tabs to verify all expected payment methods are enabled and clicking a final time on **Update settings**.
 - Two failed messages can be displayed:
 - **Invalid credentials. Make sure you enter right credential/environment and try again!:** You must check if both the API Key and User ID are correctly entered, and the environment

is properly chosen. If you are unsure what is your environment, contact your Verifone representative.

- **Account could not be auto-configured, manual configuration is required:** Follow the steps from the [Manual setup](#) documentation.

(Optional) Advanced settings

The screenshot shows the WordPress admin dashboard with the WooCommerce settings page open. The left sidebar contains navigation links: Dashboard, Posts, Media, Pages, Comments, WooCommerce (highlighted), Home, Orders, Customers, Reports, Settings (highlighted), Status, Extensions, Products, Payments (with a red notification badge '1'), Analytics, Marketing, Appearance, Plugins (with a red notification badge '3'), Users, Tools, and Settings. The main content area is titled 'Settings' and has tabs for General, Products, Shipping, Payments (selected), and Accounts & Payments. Under the 'Payments' tab, the 'Verifone Hosted Cart' section is visible, with a description: 'Accept card payments and other payment options available in your Verifone account' and 'Register this link to your Verifone Account'. A link icon and the URL 'https://2comerchant.ddns.net/wordpress/wc-api/woo-verifone-webhook' are shown. Below this, there are links for 'Verifone account settings', 'Display settings', 'Card payment settings', and 'Alternative payment methods'. The 'Advanced settings' section follows, containing: 'Override return url' with a text input field containing 'https://my-other-site.com/cool-success'; 'Transaction type' with radio buttons for 'Pre-auth', 'Auth', and 'Sale' (selected); 'Complete order on payment' with a checked checkbox; 'Enable cURL verify host and peer' with a checked checkbox; and 'Manage orders' with an unchecked checkbox. A 'Save changes' button is at the bottom.
