

Direct to Processor Implementations

Not all functionality in this Integration Guide is available for direct to processor implementations. This section provides general guidelines and is meant to be used in conjunction with the rest of this manual. If you have additional questions, contact your Verifone representative.

- Pre-integration: Verifone Systems Engineer or Sales
- During integration: Verifone Integration Consultant or Solution Implementation Manager

Note

For Point direct to processor implementations, the CTROUTD transaction token is available for follow-on transactions until the batch file is closed by the host.
