

## Void

This command voids a previous transaction. Often the authorization code is also reversed.

### Rules

When using First Data Rapid Connect processor, a Void cannot be issued 25 minutes after the original Sale transaction. When that amount of time has transpired, you must process the transaction as a Credit (Return). When using Vantiv processor in an SCA 'direct to processor' implementation, the CTROUTD is stored only for the day - after that amount of time has transpired, you must process the transaction as a Credit (Return) with the card token.

### Configuration Parameter

No configuration parameters is applicable for the command.

### Message Interface

Refer to the below Protocol section for the command fields description and examples.

- [VOID](#)
