

Contents Download from VHQ

Content Management section in VHQ allows to download the media contents to the Engage devices. Follow the steps below for more understanding on the download process.

1. Identify the file name and file location from Administration section. Administration section consists of valid names/values based on Engage Media specification, if the file name is not listed, then need to add manually by pressing **+** button and filling in the required details according to the Engage Media guidelines.

The screenshot displays two screenshots of the Verifone web interface. The top screenshot shows the 'Filename on Device' configuration page. The bottom screenshot shows the 'Device File Location' configuration page.

Filename on Device Configuration:

<input type="checkbox"/>	User Friendly Name	File Name On Terminal	Description
<input type="checkbox"/>	AD DEMO IMAGE MEDIA	m400_scaidleimage.png	Idle Screen Image for Ad Purpos
<input type="checkbox"/>	AD JPG IMAGE Media	m400_lineitemad.jpg	Ad for lineitem and Waiting scre
<input type="checkbox"/>	Advt Image 01	Advtimage_01.png	Advt image 01
<input type="checkbox"/>	Advt image 03	Advtimage_03.png	Advt image 03
<input type="checkbox"/>	Advt video 2	AdvtVideo_2.avi	Advt video
<input type="checkbox"/>	Advtimage_01.Png	Advtimage_01.Png	Advt image 01
<input type="checkbox"/>	Advtimage_02	Advtimage_02.png	Advt image 02
<input type="checkbox"/>	Idle Screen Full Video	scaidlevideo.avi	Idle screen video
<input type="checkbox"/>	Idle screen image	915_scaidleimage.png	Idle screen image
<input type="checkbox"/>	Idle screen image 2	scaidleimage.png	Idle image
<input type="checkbox"/>	IDLEscreen image	PARK.jpg	new idle screen image for v400c
<input type="checkbox"/>	Lane Closed Screen	scalaneclosedimage.png	lane closed image

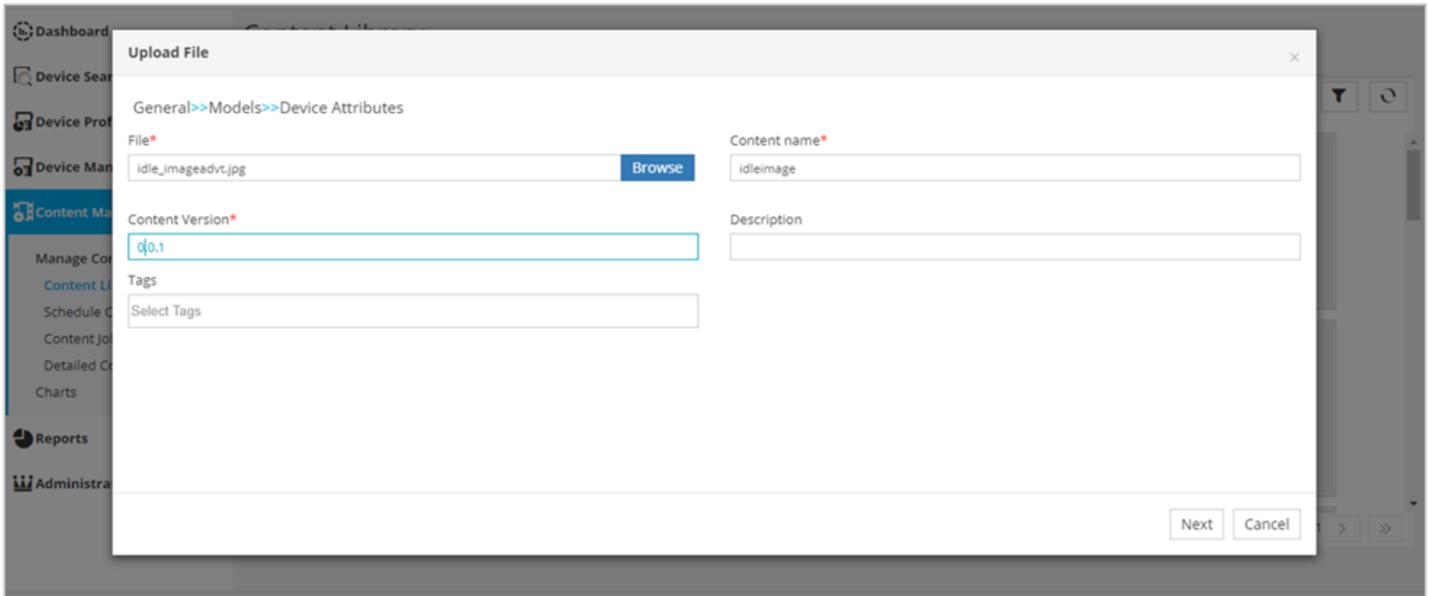

Device File Location Configuration:

<input type="checkbox"/>	Device File Location	User Friendly Name	Description
<input type="checkbox"/>	/home/usr1/flash/www/	Ads Media Content Location	Ads on Idle screen testing
<input type="checkbox"/>	/home/usr1/flash	flash	User flash directory
<input type="checkbox"/>	/home/usr1/flash/www/854x480C15T/Images	M400 Images	Images Media File path for M400
<input type="checkbox"/>	/home/usr1/flash/www/854x480C15T/Videos	M400 video	M400 Video Location
<input type="checkbox"/>	/home/usr1/flash/www/Images	NRF Test 2	NRF Test 2
<input type="checkbox"/>	/home/usr1/flash/www/320x480C15T/Images	v400c images	media file path fro v400c
<input type="checkbox"/>	/home/usr1/flash/www/320x480C15T/Videos	v400c videos	file path for v400c videos

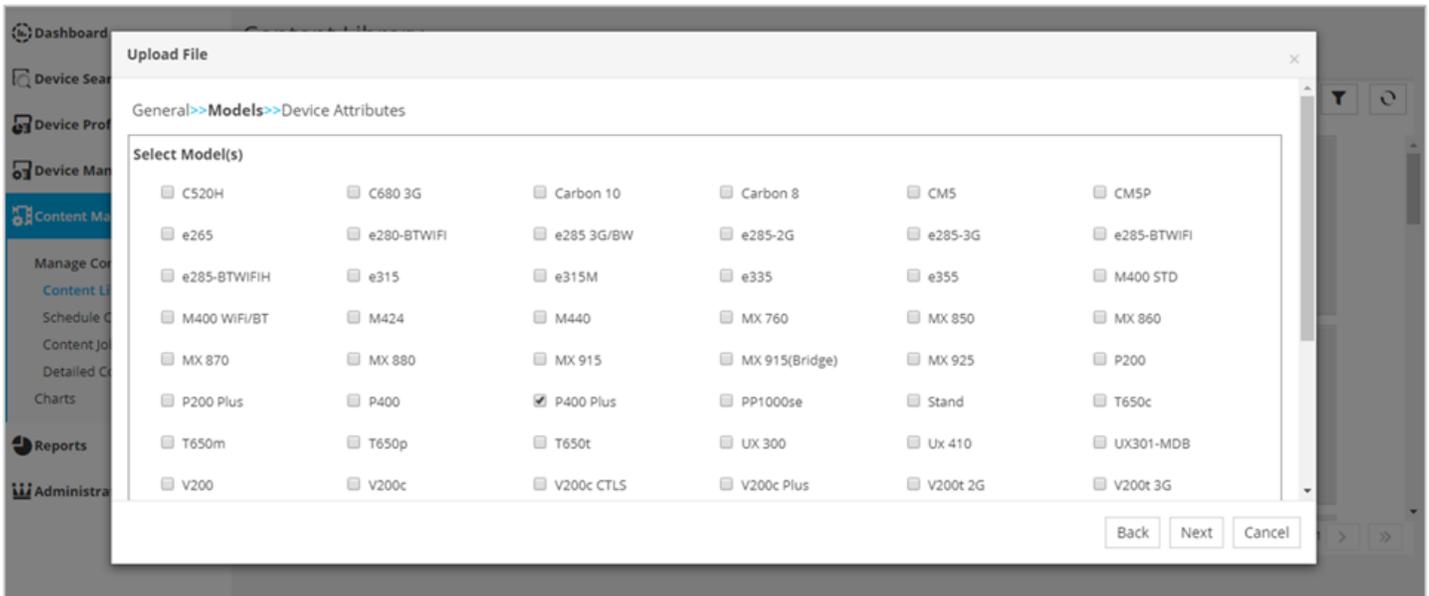

2. Select Content Library option from Content Management section to upload the file.

3. Fill in the required details on the selected file.

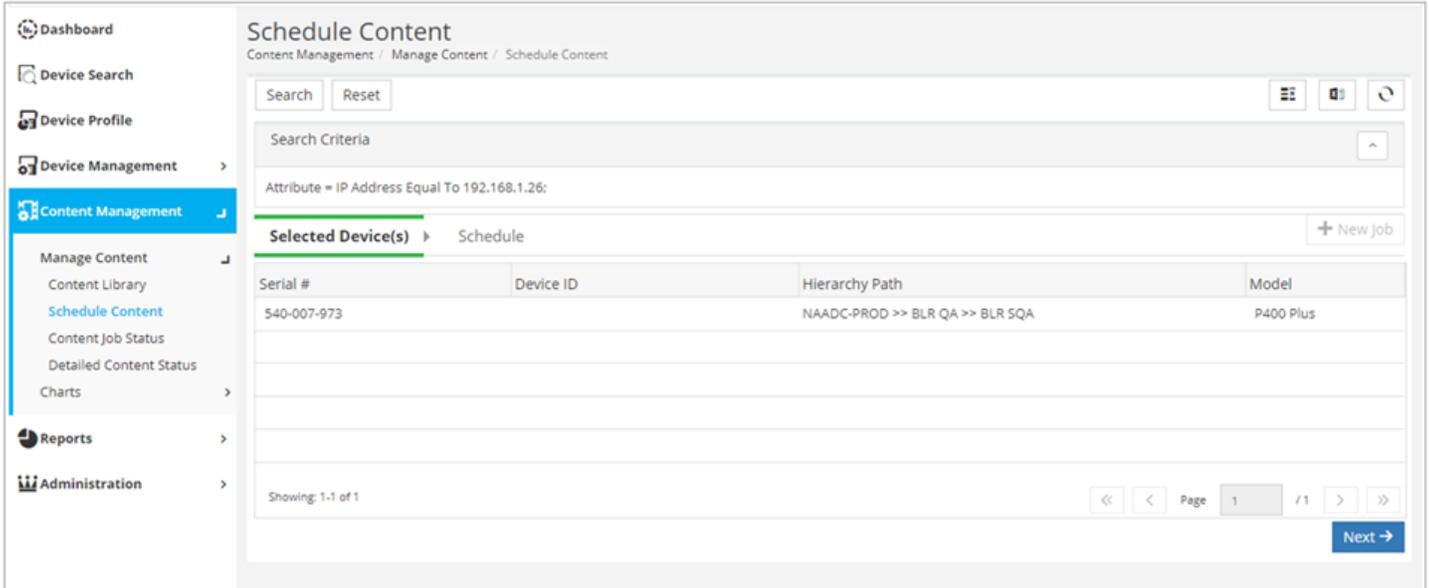

4. Click Next and select the device model from Device Attributes screen.

5. Click Next and in the following page, enter all details corresponding to what was found in file name and file location in Administration section. **For example:** P400/V400 Idle screen

6. Click Upload File button to upload the required file.
7. Select Schedule Content option from Content Management section.

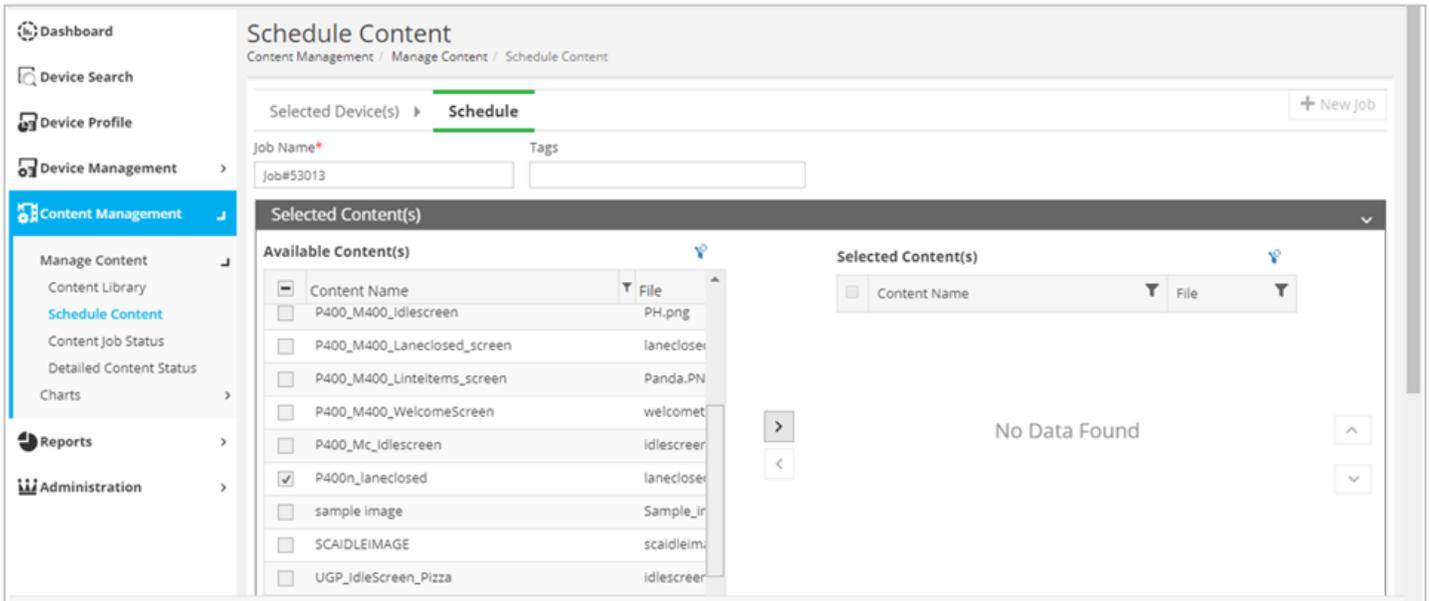

The screenshot shows the 'Schedule Content' page in the Verifone management system. The left sidebar contains navigation options: Dashboard, Device Search, Device Profile, Device Management, Content Management (selected), Manage Content, Content Library, Schedule Content (highlighted), Content Job Status, Detailed Content Status, Charts, Reports, and Administration. The main content area is titled 'Schedule Content' and includes a search bar with 'Search' and 'Reset' buttons. Below the search bar, the search criteria are set to 'Attribute = IP Address Equal To 192.168.1.26:'. A table titled 'Selected Device(s)' shows one device with the following details:

Serial #	Device ID	Hierarchy Path	Model
540-007-973		NAADC-PROD >> BLR QA >> BLR SQA	P400 Plus

At the bottom of the table, it indicates 'Showing: 1-1 of 1' and includes pagination controls for Page 1 of 1, along with a 'Next' button.

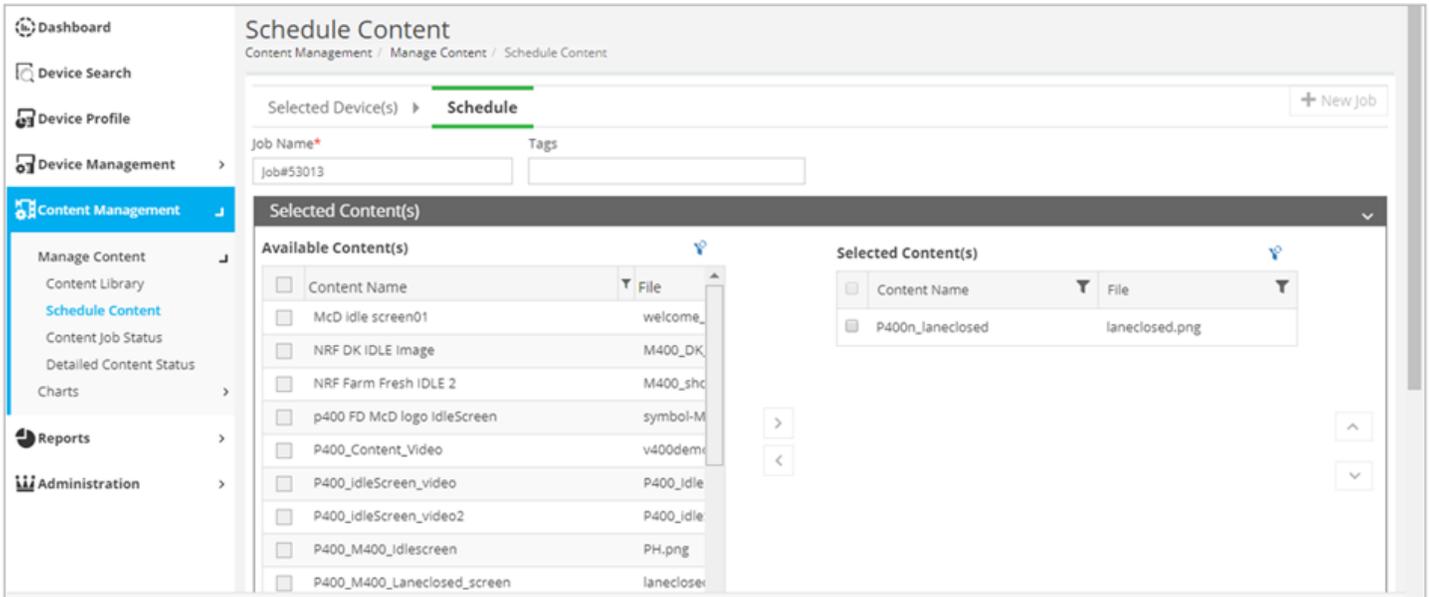

8. Select the serial number and click Next.
9. Select the file, which was uploaded earlier, from Available Content(s) list and move right in Selected Content(s) section.

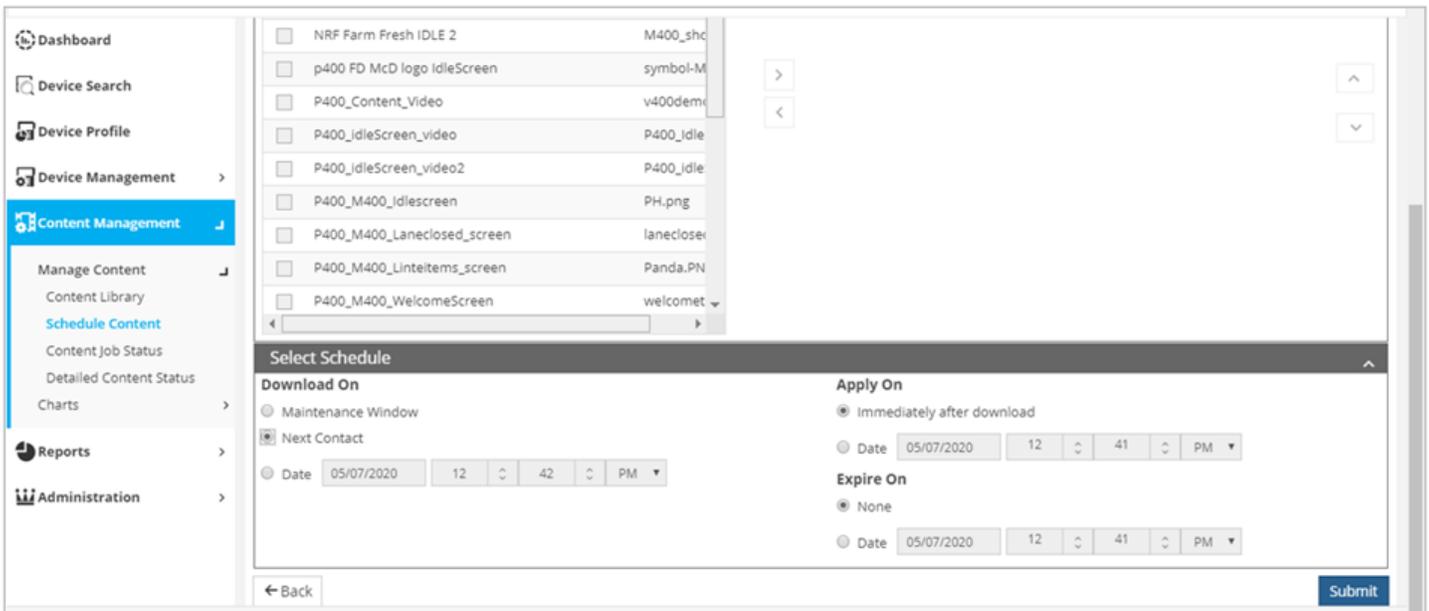

This screenshot shows the 'Schedule Content' page with the 'Schedule' tab selected. The 'Job Name' field contains 'Job#53013'. Below this, there are two main sections: 'Available Content(s)' and 'Selected Content(s)'. The 'Available Content(s)' list includes the following items:

Content Name	File
<input type="checkbox"/> P400_M400_Idlescreen	PH.png
<input type="checkbox"/> P400_M400_Laneclosed_screen	laneclose
<input type="checkbox"/> P400_M400_Linteitems_screen	Panda.PN
<input type="checkbox"/> P400_M400_WelcomeScreen	welcomet
<input type="checkbox"/> P400_Mc_Idlescreen	idlescreer
<input checked="" type="checkbox"/> P400n_laneclosed	laneclose
<input type="checkbox"/> sample image	Sample_ir
<input type="checkbox"/> SCAIDLEIMAGE	scaldleim
<input type="checkbox"/> UGP_IdleScreen_Pizza	idlescreer

The 'Selected Content(s)' section is currently empty, displaying 'No Data Found'. A right-pointing arrow button is visible between the two sections, indicating the action to move content from the available list to the selected list.

10. Click the check box to select the file and then select Schedule and Submit to start the download process.

11. Select Detailed Content Status option from Content Management section to see the progress of downloading.
