

Time Zone Setting

Time zone setting is different on VOS1/VOS2 and VOS3 devices.

The common way on all platforms is to use the ADK-SYS property:

```
sysSetPropertyString( SYS_PROP_TIME_ZONE_NAME, value )
```

- write-only, Set time zone using name, e.g. US/Hawaii

Alternate time setting on VOS1, VOS2

- by the [Timezone setting](#) package install;

Alternate time setting on VOS3

- via the **MAC Control Panel / Date&Time / Time zone menu;**
