Constructor & Destructor Documentation

◆ __init__()

def __init__	(		*self*	)	

Member Function Documentation

◆ read_file()

def read_file	(		*archive*,	static
			path	
	)			

Extract archive from file recursively to build in-memory node tree.

Parameters

archive	archive root node
path	path to the archive file

◆ read_fileobj()

def read_fileobj	(		*archive*,	static
			fileobj,	
			name	
	)			

Extract archive from file object recursively to build in-memory node tree.

Parameters

archive	archive root node
fileobj	path to the archive file
name	name of the root archive node

◆ read_pickled_file()

def read_pickled_file	(		*path*,	static
			gz = `False`	
	)			

Extract pickled file.

Parameters

path	path to the pickled file
gz	whether pickled file is gzipped :return pickled object

Field Documentation

◆ last_node_added_stack

last_node_added_stack
