SdiLanguage Class Reference

```
#include <sdi_lang.h>
```

Public Member Functions

	<u>SdiLanguage ()</u>
	<u>SdiLanguage (Language languageId)</u>
Language	<u>getLanguageId ()</u>
void	<u>setLanguageId (Language languageId)</u>
void	<u>selectLanguage (unsigned char *rsp, unsigned short *rspSize)</u>

Constructor & Destructor Documentation

[? SdiLanguage\(\) \[1/2\]](#)

[SdiLanguage \(\)](#)

default constructor

[? SdiLanguage\(\) \[2/2\]](#)

[SdiLanguage \(Language languageId \)](#) explicit

constructor with predefined language id

Parameters

languageId preset of language id

Member Function Documentation

? getLanguageId()

Language getLanguageId ()

get language id

Returns

language id

? selectLanguage()

```
void selectLanguage ( unsigned char * rsp,  
                      unsigned short * rspSize  
                    )
```

select language from response

Parameters

rsp response
rspSize size of response

? setLanguageId()

void setLanguageId (Language *languageId*)

set language id

Parameters

languageId language id to set
