Void

This command voids a previous transaction. Often the authorization code is also reversed.

Rules

When using First Data Rapid Connect processor, a Void cannot be issued 25 minutes after the original Sale transaction. When that amount of time has transpired, you must process the transaction as a Credit (Return). When using Vantiv processor in an SCA 'direct to processor' implementation, the CTROUTD is stored only for the day – after that amount of time has transpired, you must process the transaction as a Credit (Return) with the card token.

Configuration Parameter

No configuration parameters is applicable for the command.

Message Interface

Refer to the below Protocol section for the command fields description and examples.

- [VOID](#)
