

Line Item End

This command is used for basket finalizing and sending the trigger to the CP apps on the device. This command signifies the transition from line-item basket formation to the payment transaction.

Rules

The session should be active and LINEITEMDISPLAY parameter should be enabled.

Configuration Parameter

Following are the configuration parameters which affect the operation:

- LINEITEMDISPLAY
- FULLLIDISPLAYENABLED
- LIMEDIAMODE
- RECEIPTLINEITEMDISPLAY

Message Interface

Refer to the below Protocol section for the command fields description and examples.

- [LINE_ITEM_END](#)
