Device Name Query

This command retrieves the device name stored on the payment device.

Rules

The GET_DEVICENAME command is intended for non-payment purposes and is to be used outside of a payment transaction.

Configuration Parameters

Following are the related configuration parameters for this functionality. Refer to [Application Parameters](#) table for the parameter details.

- DEVICENAME
- DEVICENAMEENABLED

> **Note**
>
> Device Name Query functionality is independent of any configurable parameters. However, when the above mentioned parameters are set to the required, Device name query responses with that value in the DEVICENAME field.

Message Interface

Refer to the below Protocol section for the command fields description and examples.
