Release Overview

Verifone March release (6.9.2.1) provides new features, bug fixes, and performance improvements to make the terminal better for you.

The release targets Android 13 NEO2 devices, and is used for both factory builds and field updates.

Please check the status of the individual products carefully, as some of them are still going through certification.

[Android User Guides](#)

Supported Platform (Android)

This release targets the following Verifone products:

- Countertops: Verifone V660c-A
- PIN Pads: Verifone M450-A/M425-A, M450/M425 Plus-A, P630 Plus-A
- Portable: Verifone V660p

New Features

New features in VAOS 6.9.2.1:

- Automated testing: Added support for testing REST API on DevKit devices to simulate payment-related events. Please contact Verifone support for details.

New features in VAOS 6.9.2:

- No new features

New features in VAOS 6.9.1:

- No new features

Fixed Issues

Fixed Issues in VAOS 6.9.2.1:

- Multi-lane
  - Removed base control manager apk from devices that do not support Full feature base - for example, P630 Plus-A, M425-A, M450-A, etc
  - Android 13 Sysmode now supports copying VRK certificates on external storage (USB and SD cards)
  - Fixed access issue when using the serial connector on Orange dongles on an M425-A or M450-A

Fixed Issues in VAOS 6.9.2:

- All NEO and NEO2-based devices
  - Add support for password-protected applications including settings
- Portable and Mobile
  - A13: All Verifone-based apps are now included in POST_NOTIFICATIONS's protection level to auto-grant this permission
  - Settings: Android 13 now supports password-protected applications and settings as on Android 10
- Countertop
  - Fixed issue with double tap gestures on camera, which can start the camera during sleep mode.

Fixed Issues in VAOS 6.9.1:

- All NEO and NEO2-based devices
  - Android SDK: Fixed an issue with NDK dependencies. It is recommended to update to this version of the Android SDK.
- Portable and Mobile
  - Android13: Fixed an issue with not freed resources, which caused application crashes after multiple transactions.
  - Android 13 settings: APNs are no longer hidden in settings screens.

Known Issues:
