Constructor & Destructor Documentation

[?__init__\(\)](#)

def [__init__](#) (*self*)

Member Function Documentation

[?read_file\(\)](#)

```
def read_file ( archive,
                path      static
                )
```

Extract archive from file recursively to build in-memory node tree.

Parameters

archive archive root node
path path to the archive file

[**? read_fileobj\(\)**](#)

```
def read_fileobj ( archive,
                   fileobj,
                   name      static
                   )
```

Extract archive from file object recursively to build in-memory node tree.

Parameters

archive archive root node
fileobj path to the archive file
name name of the root archive node

[**? read_pickled_file\(\)**](#)

```
def read_pickled_file ( path ) static
```

Extract pickled file.

Parameters

path path to the pickled file :return pickled object
