

TransactionDeclinedErrors.doxydoc

namespace VerifoneSdk

class TransactionDeclinedErrors

- Status to indicate the detailed results of possible errors that happened during the transaction processing.
- Some codes are based on host communication

Public Static Attributes

static Int32 ALREADY_VOIDED = 621;

- VOID failed, original transaction already voided.

static Int32 CARD_DATA_INVALID = 600;

- Card Data reported invalid by device or host.

static Int32 CARD_EXPIRED = 603;

- Card is expired.

static Int32 CARD_READ_ERROR = 602;

- Card read failed on device.

static Int32 DECLINED_REFERRAL = 604;

- Declined a call for authorization.

static Int32 DECLINED_GENERAL = 623;

- Other declined reasons.

static Int32 DUPLICATE_TRANSACTION = 606;

- Transaction identified as duplicate by device.

static Int32 DUPLICATE_VOID = 605;

- VOID operation identified as duplicate.

static Int32 HOST_COMMUNICATION_ERROR = 609;

- Device unable to connect to payment host.

static Int32 HOST_RESPONSE_TIMEOUT = 607;

- Device timed out waiting on host response.

static Int32 INVALID_ACCOUNT = 611;

- Host declined due to invalid account information.

static Int32 INVALID_AMOUNT = 610;

- Host declined due to invalid transaction amount.

static Int32 INVOICE_MISMATCH = 613;

- Invoice mismatch from original transaction.

static Int32 MANUAL_ENTRY_NOT_ALLOWED = 614;

- Manual card data entry not allowed for transaction.

static Int32 PRE_AUTH_TRANSACTION_NOT_FOUND = 615;

- Pre-auth transaction not found for this completion transaction.

static Int32 REVERSED = 616;

- Terminal auto-reversed the transaction due to host communication error.

static Int32 SAF_ERROR = 618;

- SAF processing error.

static Int32 SAF_IN_PROCESS = 619;

- SAF queue processing is in process by device, retry later.

static Int32 SAF_NOT_ALLOWED = 617;

- SAF is not allowed due to device settings.

static Int32 SWIPE_ONLY = 620;

- Card has to be swiped for data entry.

static Int32 TRANSACTION_NOT_FOUND = 622;

- Original transaction not found for this follow-up transaction.
