

Checkout

Overview

Checkout is an end-to-end solution that supports accepting payments securely hosted by Verifone. You can configure Checkout to accept card payments, as well as alternative payment methods through the same page. PCI-compliant card payments can be accepted through the checkout as a Hosted Payments Page (HPP), or as an iFrame.

Read [Accepting payments](#) to start your integration.

Demo

The screenshot displays a Verifone checkout interface. At the top left is the Verifone logo, and at the top right is the total amount of €119.99. Below this, the order details are listed: Reference (ORDER-1234), Descriptor (SNEAKERS DELUXE CO.), and Customer (John). The main section is titled 'Credit card' and features a card icon. It contains three input fields: 'Card number' with a placeholder 'Your card number', 'Expiry' with a placeholder 'MM/YY', and 'CVV' with a placeholder 'CVV'. A prominent blue button labeled 'Pay €119.99' is positioned below the inputs. Underneath the button, it states 'Secure payments provided by Verifone'. In the bottom right corner of the form area, there is a language dropdown menu currently set to 'English'.
