

Adding Devices - Bulk Import

To add the devices manually through bulk import.

- Go to Verifone Central -> Device Management -> Devices -> Add Devices.

The screenshot displays the Verifone Central web interface. The top navigation bar includes the Verifone logo and menu items: Device Management, Reports, Administration, and Help & Support. The left sidebar shows a 'Devices' menu with 'View Devices' and 'Add Devices' (highlighted with a yellow box). The main content area features a 'PRE-SIT' status bar with a count of 34,123. Below this, four summary cards are shown: 'Total Device Count' (34123), 'Pending Registration' (67128), 'Scheduled Devices' (2), and 'Low Ram Devices' (5). A table at the bottom lists device details with columns for Model, Device Status, Last Heartbeat, Hierarchy, and Device ID. The table is currently empty, showing only the column headers.

	Model	Device Status	Last Heartbeat*	Hierarchy	Device ID
<input type="checkbox"/>			Last Heartbeat	Hierarchy	Device ID
