

Use Invoice4U with Virtual Terminal

Overview

Invoice4U payment documents will be available in Virtual Terminal after the service is [activated](#) by Verifone.

The payment documents will be generated automatically after the transaction is captured and will be sent to the shopper's mailbox. For each transaction, the details regarding the payment document will be available in your Verifone Central account.

Availability

Invoice4U via Virtual Terminal is available for Merchant Cashier and Merchant Supervisor roles.

Workflow

1. Log in to your Verifone Central account.
2. Navigate to the **Payment Tools** tab and click on the **Virtual Terminal** section from the drop-down menu.
3. Fill in the **Payment Settings** page with your **Organization** information, **Payment Provider Contract**, **Transaction type**, and **Authorization Type**.
4. Go to the **Payment Documents** section which details the following mandatory fields:

Payment Documents

Payment document provider

 ✕ ▼

Document Type

 ✕ ▼

Document will be sent to the customer automatically

Payment document language

 ✕ ▼

Document subject (Optional)

Max 200 characters

- **Payment document provider** - Select which Invoice provider you want to use for this transaction. You can choose:
 - **None** - if you do not wish to generate a commercial document for this transaction
 - **Invoice4U** - if you want to generate a commercial document for this transaction

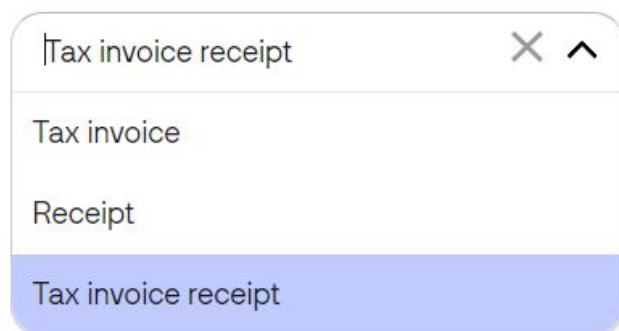

Payment document provider

A dropdown menu with a search bar containing 'Invoice4U'. The menu is open, showing two options: 'Invoice4U' (highlighted in blue) and 'None'.

- **Document Type** - If you select *Invoice4U*, the following options will become available:
 - Tax Invoice
 - Receipt
 - Tax Invoice Receipt

Document Type

A dropdown menu with a search bar containing 'Tax invoice receipt'. The menu is open, showing three options: 'Tax invoice', 'Receipt', and 'Tax invoice receipt' (highlighted in blue).

- **Payment document language** - Select Hebrew or English.

Payment document language

A dropdown menu with a search bar containing 'Hebrew'. The menu is open, showing two options: 'English' and 'Hebrew' (highlighted in blue).

- **Document subject** (Optional field) - where the merchant can specify a general description of the document (a maximum of 200 characters are allowed), which is not necessarily reflected in the line items. Such subjects can be "Monthly subscription", "Invoice for services rendered", etc. The *Document subject* field corresponds to the `sales_description` field from [Checkout](#)

[API.](#)

Document subject (Optional)

Max 200 characters

5. Go to the **Customer Details** section and fill in the specific information (First name/Last name/ Email address - used to send the payment document).

Customer details

First name

Used on the payment document

Last name

Used on the payment document

Email address

Used to send the payment document

Tax identification number (Optional)

6. Go to the **Transaction Settings** section. Several workflows are possible here:
 - **Without line items** - If the **Receipt** document type is chosen in the *Payment Documents* section, the transaction amount is required while the line items are not.

 ✓

- **With line items** - If the **Tax invoice** and **Tax invoice receipt** document type is chosen, the line items are required.

Transaction Settings

Tax settings

- ☒ Use the Invoice4U tax settings
☐ Add custom tax

Product	Qty	Price
Name <input type="text" value="Name what you charge for"/>	<input type="text" value="3"/>	Amount per unit <div> <input type="text" value="ILS"/> <input type="text" value="5.50"/> </div> <small>Price including VAT</small>
Code (Optional) <input type="text"/>		
<input type="button" value="Add Product"/>		
<div>Total price (VAT included)</div> <div>ILS 16.50</div>		

7. Go to **Tax settings**. When selecting payment documents with line items for **Tax invoice** and **Tax invoice receipt**, the following two radio button options will be available:

- **Invoice4U tax settings** - the default tax settings set in your Invoice4U account will be applied to your products. Set the **Product Name**, quantity (**Qty**), **Amount per unit** (tax included), and the optional stock keeping unit ID (**Code**). Use the **Add Product** button to add additional product lines.

- **Add custom tax** - where in addition to the aforementioned details, you can also specify per product line item, by selecting from the dropdown menu, whether it is **Taxable** (with current value of 17%, as per Israeli VAT) or **Exempt** (0% tax rate).
