- **Organization:** The organization associated with this transaction
- **Reference:** The transaction reference number. For New Zealand in-store EFTPOS terminals, this is the RRN
- **Channel:** Where the sale originated, i.e., on a terminal or online. If the channel is given as 'POS', this means the transaction was processed on a terminal in-store.

Click on the tabs to see more information about the transaction:

- **History:** History events with their log information: type, amount, currency, date and time, transaction UUID, user.
- **Actions:** Operations that can be performed on each transaction such as: **Capture**, **Void** and **Refund**. The actions available depend on the type and status of the transaction. This tab is available only in order view.
- **Details:** More detailed information on the order / transaction including organization, settlement status and 3DS details.
- **Customer:** General customer information such as name, billing and shipping address.
- **Documents:** The tab enables the option to resend either the Merchant or Cardholder Copy of the transaction receipt. For more details check the [Payment documents](#) documentation.

For detailed information about the transaction / order fields, check the [Reporting details](#) documentation.
