

## Webhooks

### [Why are webhooks important and where can the merchant read more on this?](#)

- Ensure that Orders are updated even if the customer abandons the Hosted Payment Page (HPP)
- Sync Orders with Verifone Central so that any modification done on Verifone is reflected in Magento as well (e.g., refunds performed on Verifone Central)
- More on how to set up notifications and configure webhooks from Verifone Central can be found [here](#).

To set up webhooks for the cart events, follow these steps:

1. Go to *Magento 2* → *Settings* and click on the **Payments** tab.
2. Copy the URL below from the **Payments** tab.
