

Webhooks

Why are webhooks important and where can the merchant read more on this?

- Ensure that orders are updated even if the customer abandons the Hosted Payment Page (HPP).
- Synchronize orders with Verifone Central so that any modification done on Verifone is reflected in WooCommerce as well (e.g.: refunds performed on Verifone Central).

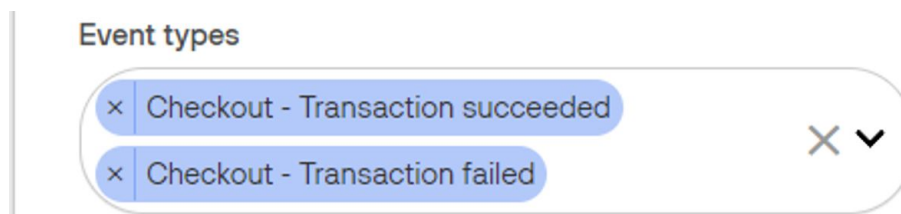

More on webhooks can be found [here](#).

To set up webhooks for the cart events, follow these steps:

1. Go to *WooCommerce ? Settings* and click on the **Payments** tab.
2. Copy the URL below from the **Payments** tab.

woocommerce add webhook new

3. Create the notification, as per the [Notifications](#) documentation. On the **Create Notification** page, provide the following information:
 - **Notification name** – Assign a name to label the purpose of your webhook.
 - **Organization(s)** – Select the Merchant Site organization setup with your plugin.
 - **Event types** – Select two events:
 - **Checkout – Transaction succeeded** and
 - **Checkout – Transaction failed**

- **Delivery Method** – Select **URL Endpoint** and paste the URL copied from step 2.
- **Webhook type** – Select **Event metadata only**.
