Webhooks

**Why are webhooks important and where can the merchant read more on this?**

- Ensure that orders are updated even if the customer abandons the Hosted Payment Page (HPP).
- Synchronize orders with Verifone Central so that any modification done on Verifone is reflected in WooCommerce as well (**e.g.**: refunds performed on Verifone Central).
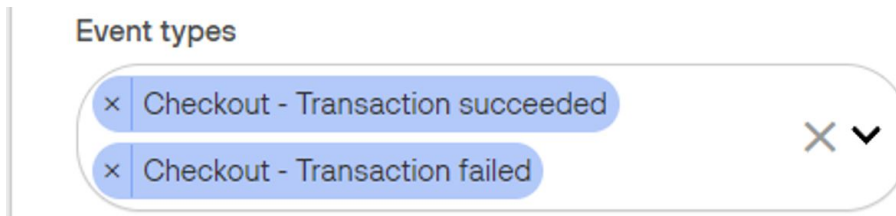

> More on webhooks can be found here.

To set up webhooks for the cart events, follow these steps:

1. Go to *WooCommerce → Settings* and click on the **Payments** tab.

2. Copy the URL below from the **Payments** tab.

3. Create the notification, as per the [Notifications](#) documentation. On the **Create Notification** page, provide the following information:
    ◦ **Notification name** – Assign a name to label the purpose of your webhook.
    ◦ **Organization(s)** – Select the Merchant Site organization setup with your plugin.

    ◦ **Event types** – Select two events:

        ▪ **Checkout – Transaction succeeded** and
        ▪ **Checkout – Transaction failed**

Event types

| × | Checkout - Transaction succeeded |
| × | Checkout - Transaction failed |

    ◦ **Delivery Method** – Select **URL Endpoint** and paste the URL copied from step 2.
   ◦ **Webhook type** – Select **Event metadata only**.
