

## Error Handling and Troubleshooting

If you encounter any errors during the installation and configuration of the WooCommerce plugin, you can find a log of all errors in the WooCommerce dashboard, under *WooCommerce* → *Status* → *Logs*. In order to speed up the resolution, attach these logs when creating a support ticket to Verifone as it will help our support teams track down the issue.

On the right-hand side of the screen, select the log you wish to view and click on the **View** button.
