

## Commerce

## Reporting

Verifone's powerful reporting and data analytics help you understand and manage your business.

The screenshot shows a dark teal navigation bar with the Verifone logo and three menu items: **Commerce** (underlined), **Devices**, and **Administration**. Below the navigation bar, the **Commerce** section is highlighted in blue. A large red arrow points from the **Commerce** section to the **Reporting** section. The **Reporting** section lists several options: **Payments Dashboard**, **Transactions**, **3D Secure Authentication**, **Settlements**, **Report Scheduler**, **Generated Reports**, and **Audit Log**.

The [Payments Dashboard](#) offers centralized information on the total number of transactions and transactions amount values, refunds, payment methods, authorization rates and other key performance indicators for business strategy.

Date range

7/28/2023 

Compare to

mm/dd/yyyy — mm/dd/yyyy 

Please select an **organization** and **currency** to view transactions.

The [reports](#) service allows you to generate reports and view in one place all your reporting issues regarding transactions, 3DS, settlements, invoices payouts, based on the role that you have.

Reports turn data into insights that help merchants optimize their business. Using filters will help you get the information you need quickly and easily. Filters let you create a smaller subset of their data and isolate the information they require.

Based on the transaction information you want to include in your report you can use different filters, such as: Organization, Merchant ID, Created/Settled Date, Currency, Channel, Product, Transaction type, Status, Stored Credential, Wallet, etc.

## Payment Tools

Verifone Central makes you able to perform payment actions using the **Payment Tools** services: [Virtual Terminal](#) and [Pay by Link](#).

### Commerce

Optimize commerce operations with a comprehensive suite of payment tools, designed to streamline transactions and maximize revenue. Stay on top of financial performance with detailed reporting on sales and revenue, and never miss a payment with a reliable payment deliverables.

[Virtual Terminal](#) is a tool that can be used to initiate payments for card-not-present (CNP) transactions. Virtual Terminal allows merchants to accept payments (when the physical store is closed) over the telephone or email.

Payment actions like capture, refund, cancel/void are actions that can be performed on payments triggered by the Virtual Terminal. These actions cannot be performed through the Virtual Terminal, but only via the transaction details which can be accessed through the transaction reports.

[Pay by Link](#) is an easy and secure way that allows merchants to receive payments from customers. You will generate a payment link by providing payment details (amount and currency) in Verifone Central. You can then share the link with your customers through the desired engagement channels. When your customers visit the link, they are prompted to complete the payment. After they have completed the payment, you can review the payment status and transaction details in Verifone Central under the Payment Links page. This integration

method is available via Verifone Central and [API](#).

## Administration

The [Administration](#) panel provides a unified service to display information on your **Account Setup**, for *Organization Company and Sites, Payment (Provider) Contracts, Points of Interaction, Users* as well as for more **Advanced Settings**, as *3DS Contracts, Wallets, Blocking Rulesets, Notifications and Checkout Themes*.

### Administration

Easily set up new accounts streamlined Account Setup process, optimize financial operations with our FinOps tools & fine-tune account with our Advanced Settings options.

When the language is set to Arabic or Hebrew in the *My Account* section, the menus and buttons might be placed differently than in the other language settings. As a result, the documentation might not describe accurately the positions of menus and buttons for the Arabic and Hebrew language versions of Verifone Central.
