## Points of Interaction

### Overview

A Point of Interaction (POI) is a physical point where a customer is interacting with the merchant to initiate payment.

By setting up a POI, you will be linking the previously configured Payment Methods in the Payment Provider Contracts to a Point of Interaction. By linking the Payment Methods to a POI, these payment methods will be enabled on the device.

Points of Interaction may include:

- Point of Sale (POS)
- Mobile Device
- Kiosk
- Unattended
- Standalone
- Auto Fuel Dispenser
- Auto Teller Machine
- Electronic Cash Register
- InFlight Commerce Terminal
- Inter Voice Response
- RF Devices
- Call Center
- Virtual
- Ticket

### Availability

The Points of Interaction can be viewed/read by all roles except for the **Merchant External Partner**, **Reseller Manager** and **Reseller Representative** roles. For more information, read the [Users and merchants roles](#) article.

### Benefits

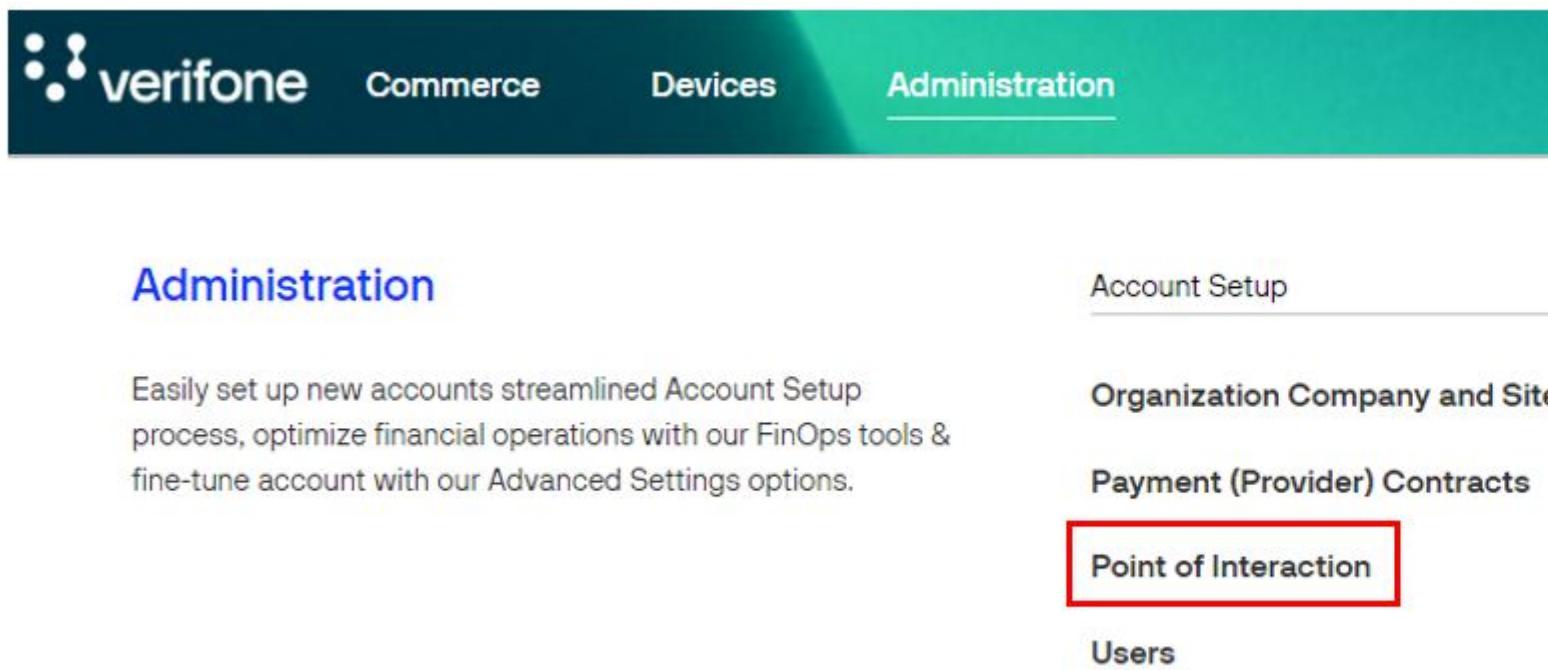

This feature provides the following benefits:

- Enables you to view your in-store solutions
- Allows you to centralize important information about your terminal such as **Device Type**, **Terminal ID** or the **Payment Provider Contract** it is associated with.

## Accessing points of interaction

The Points of Interaction (POI) page lists the points of interaction that are associated with the organizations to which your user has access.

To view this page, select **Administration > Points of Interaction** from the top menu.

The screenshot shows the Verifone Administration interface. At the top, there is a navigation bar with the Verifone logo and links for Commerce, Devices, and Administration. The Administration link is underlined, indicating it is the active page. The main content area is titled "Administration" in blue. To the right, there is a sidebar with several options: "Account Setup", "Organization Company and Site", "Payment (Provider) Contracts", "Point of Interaction" (which is highlighted with a red border), and "Users". Below the sidebar, there is a descriptive text block: "Easily set up new accounts streamlined Account Setup process, optimize financial operations with our FinOps tools & fine-tune account with our Advanced Settings options."

# Points of Interaction

Device Serial Number	Type a Device Serial Number	
Organizations	Status	
11 - 20 of 67552 Points of Interaction		
Name	Organization	Terminal ID
0001	Test Team	0001

You can use the search bar to look for a POI by:

- Device Serial Number
- Name
- Terminal ID

You can also filter the search results by:

- Organization
- Status

To view additional details of a specific POI, click its row in the table.

POI-General Information

In the detailed POI view, you will find details about your point of interaction, such as the Verifone **Terminal ID**, and **Type** of point of interaction.

Based on the type, additional fields can be available, e.g., **Device serial number**, **Device ID**, etc. for devices of type “Point of Sale”.

If any **Payment Provider Contracts** are associated with your POI, they will also be listed on this page.
