

Users and merchants roles

Overview

Each user is created with a certain role(s) which will provide a specific set of permissions. Users will always be created in an organization, as this will determine the access scope of the user. If the user is created in a top-level organization, they will have access to all organizations below. In case the user is boarded into a lower-level organization, the scope will be reduced to that specific organization.

You can view and search for users in your organization by name or email address on the **Administration -> Users** tab, depending on your access level. **Merchant admins can also add new users** on the **Administration -> Users** tab.

Roles and permissions

Below are presented the merchant roles and the permissions levels of merchant users in Verifone Central:

- **Merchant Admin** - This is an administrative role which can onboard new users & updates blocking rulesets. It is the Verifone Cloud Services account contact person providing Portal access to your employees. An organization may have more than one Merchant Admin.
- **Merchant Order Admin** - This role is assigned to users who can have permission to create, view and modify orders with Order Service and Boarding UI. It is complimentary to the `MERCHANT_ADMIN` role, meaning this can be added to a user which also has the `MERCHANT ADMIN` role.
- **Merchant Reviewer** - This role is an external viewing role. It will grant viewing access for all dashboards on the Portal but restricts the user from performing actions.
- **Merchant Supervisor** - This role is assigned to the owner of the organization. This user is able to use all payment tools and perform all payment actions. It has read access for the *Transaction* dashboard, *Organizations* list, and *Point of Interaction (POI)* list.
- **Merchant User** - This role is granted viewing access but restricts the user from performing actions. It is ideal for call center support staff. It has read access for the *Transaction* dashboard, *Organizations* list, and *POI* list.
- **Merchant Cashier** - This role has access to the payment tools but cannot issue any refund. It has read access for the *Transaction* dashboard, *Organizations* list, and *POI* list.
- **Merchant External Partner** - This role is assigned to users which are outside of the merchant's company/ business, but are still trusted to get access to merchant data (such as transaction data, etc.).
- **Provider White Label Manager** - This role is assigned to users which have acquired the *White Label* feature. The feature enables users to customize the layout and designs of their *Organizations* within *Verifone Central*.
- **Reseller Manager** - An external reseller employee who can create, view and manage orders at any country level within their reseller group.
- **Reseller Representative** - An external reseller user who can view the portfolio, create, view and manage orders on behalf of the country the user is in.

A user with multiple roles inherits all the rights and permissions of all assigned roles
However, the **Merchant External Partner** role will overwrite the rights and permissions of the other assigned roles.

Creating new users

Here is how you can create a new user:

Only users with **Merchant Admin** access can set up new users, as per the above table.

1. Select **Administration > Users**.

2. Click **Add New User**.

[< Users](#)

Add new user

General details

First name

Middle name (Optional)

Last name (Optional)

Email

Interface language

English ▾

Access rights

Organization

Merchant roles

☐ Merchant User
A viewing role. This user role will grant viewing access, but restricts the user from performing actions.

☐ Merchant Admin
Administrative role which can on-board new users & update blocking rulesets.

☐ Merchant Supervisor
The owner of the organization, this user will be able to use all payment tools and perform all payment actions.

☐ Merchant Cashier
This role will have access to the payment tools, but can not issue any refund.

☐ Merchant Reviewer
An external viewing role. This user role will grant viewing access, but restricts the user from performing actions.

☐ Merchant External Partner

[Cancel](#) [Save](#)

3. Complete the following fields:

- Full name
- Email address

<https://verifone.cloud/docs/verifone-central/verifone-central/manage-your-account/administration/users-and-merchants-roles>

Updated: 28-Apr-2025

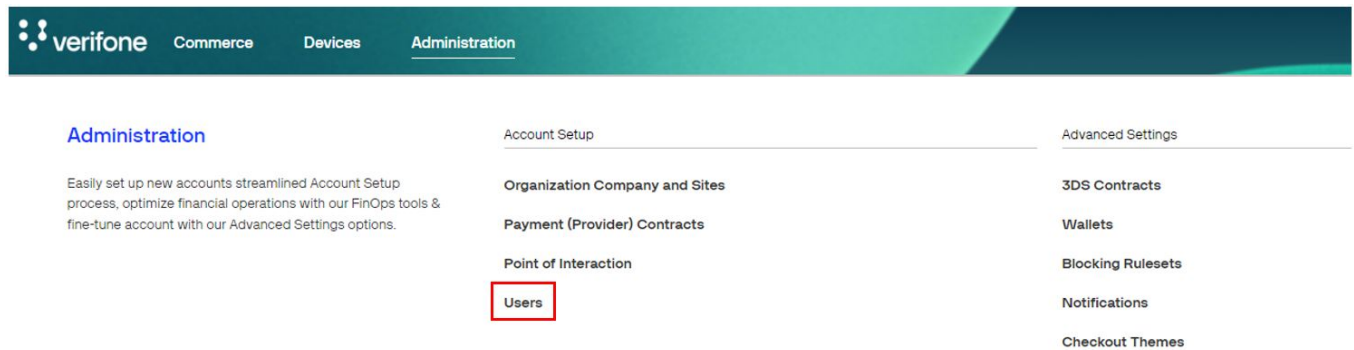

- Organization
- Access rights - determines the level of access needed for transaction tasks. See the [Roles and permissions](#) section above for more details.

The new user will receive an email inviting them to set up a password to activate their account.

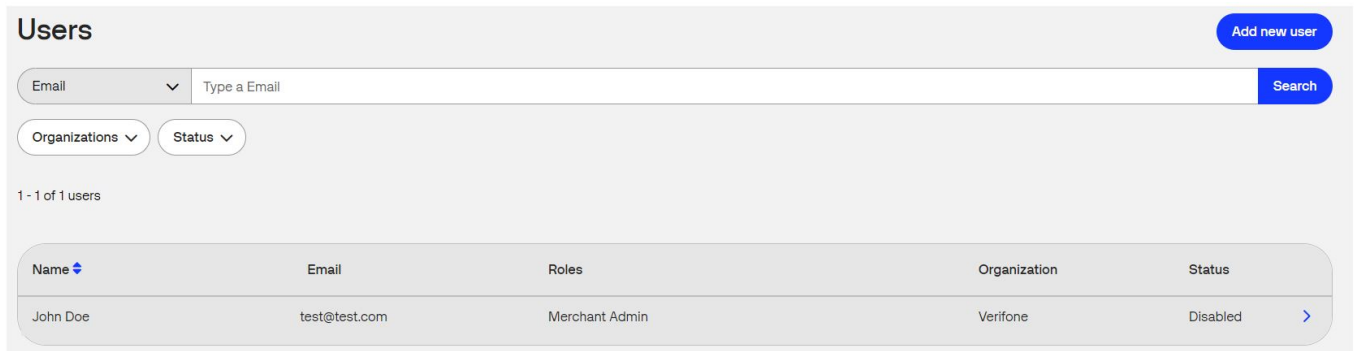

Deleting a user

Only users with **Merchant Admin** access can delete users, as per the above table.

1. Select **Administration > Users**.

2. Select the needed user from the user list.

3. Click on **Delete user**.

[< Users](#)

John Doe

General information

First name	John
Middle name	
Last name	Doe
Organization	Verifone
Organization ID	75c0d895-4597-49e3-b591-4a4c555045f9
Email	test@test.com
Roles	Merchant Admin
Status	Disabled

Delete userEnable user

Only users having the **Disabled** status can be deleted.

4. A confirmation message will be displayed. Select a reason for the deletion and click on **Delete user**. If you don't want to delete the user select the **Keep user** button.

Delete user
✕

Are you sure you want to delete user **John Doe**? This will permanently delete their account.

Please select a reason for deletion:

☐ This user is no longer required.
☒ Wrong email address has been added.
☐ Others

Keep user

Delete user

5. Deleted users will still be visible in the user list, with the status *Deleted*.
