### Users and merchants roles

### **Overview**

Each user is created with a certain role(s) which will provide a specific set of permissions. Users will always be created in an organization, as this will determine the access scope of the user. If the user is created in a top-level organization, they will have access to all organizations below. In case the user is boarded into a lower-level organization, the scope will be reduced to that specific organization.

You can view and search for users in your organization by name or email address on the **Administration** -> **Users** tab, depending on your access level. **Merchant admins can also add new users** on the **Administration** -> **Users** tab.

# **Roles and permissions**

Below are presented the merchant roles and the permissions levels of merchant users in Verifone Central:

- Merchant Admin This is an administrative role that can onboard new users and update blocking rulesets. It is the Verifone Cloud Services account contact person providing portal access to your employees. An organization may have more than one Merchant Admin.
- Merchant Order Admin This role is assigned to users who have permission to create, view, and modify orders with Order Service and Boarding UI. It is complementary to the MERCHANT\_ADMIN role, meaning this can be added to a user who also has the MERCHANT ADMIN role.
- Merchant Reviewer This role is an external viewing role. It will grant viewing access for all dashboards on the Portal, but restricts the user from performing actions.
- **Merchant Supervisor** This role is assigned to the owner of the organization. This user is able to use all payment tools and perform all payment actions. It has read access for the *Transaction* dashboard, *Organizations* list, and *Point of Interaction (POI)* list.
- **Merchant User** This role and is granted viewing access but restricts the user from performing actions. It is ideal for call center support staff. It has read access for the *Transaction* dashboard, *Organizations* list, and *POI* list.
- **Merchant Cashier** This role has access to the payment tools but cannot issue any refund. It has read access for the *Transaction* dashboard, *Organizations* list, and *POI* list.
- Merchant External Partner This role is assigned to users who are outside of the of merchant's company/ business, but are still trusted to get access to merchant data (such as transaction data, etc.).

- **Provider White Label Manager** This role is assigned to users who have acquired the *White Label* feature. The feature enables users to customize the layout and designs of their *Organizations* within *Verifone Central*.
- **Reseller Manager** An external reseller employee who can create, view, and manage orders at any country level within their reseller group.
- **Reseller Representative** An external reseller user who can view the portfolio, create, view, and manage orders on behalf of the country the user is in.

A user with multiple roles inherits all the rights and permissions of all assigned roles However, the Merchant External Partner role will overwrite the rights and permissions of the other assigned roles.

# **Managing users**

### **Creating new users**

You can create new users by following the steps below or by watching this video tutorial.

Follow these steps to create a new user:

Only users with Merchant Admin access can set up new users, as per the above table.

1. Select **Administration** > **Users**.

Devices

### Administration

: verifone

Easily set up new accounts streamlined Account Setup process, optimize financial operations with our FinOps tools & fine-tune account with our Advanced Settings options.

Account Setup

Organization Company a

Payment (Provider) Conf

Point of Interaction

Users

2. Click Add New User.

#### 3. Complete the following fields:

- o Full name
- o Email address

Creating accounts with fake domains (example: Yopmail, Getnada, Guerrillamail) on the production environment is banned. The existing accounts created using fake domains on production have been disabled.

If a user is created using these domains the error message *This email domain is not supported*. *Please try another address*. will be displayed.

Organization

• Access rights - determine the level of access needed for transaction tasks. See the <u>Roles and</u> permissions section above for more details.

The new user will receive an email inviting them to set up a password to activate their account.

### Deleting a user

You can <u>delete a user</u> by following the steps below or by watching this short video tutorial. Before deleting a user, you need to <u>disable</u> them first, as only disabled users can be deleted.

Only users with Merchant Admin access can delete users, as per the above table.

1. Select **Administration** > **Users**.

2. Select the needed user from the user list.

# Users Email ✓ Type a Email Organizations ✓ Status ✓ 1-1 of 1 users Name ♦ Email Roles John Doe test@test.com Merchan

3. Click on **Delete user**.

Only users having the **Disabled** status can be deleted.

4. A confirmation message will be displayed. Select a reason for the deletion and click on **Delete user**. If you don't want to delete the user select the **Keep user** button.

5. Deleted users will still be visible in the user list, with the status *Deleted*.

# Managing hierarchy groups

To check more information on hierarchy groups, check the Organizations documentation.

# Adding new organization groups

1. Select **Administration** > **Users**.

# Administration

Easily set up new accounts streamlined Account Setup process, optimize financial operations with our FinOps tools & fine-tune account with our Advanced Settings options.

2. Click on **Add new organization group**.

# Users

Type a Group name

# 1 - 10 of 1117 organisations

3. Enter the group name and select a parent organization. Select at least two organizations. Click **Save** to create the group.

-

....

P

U

4. The created group will appear on the *Users* page once you switch to the **Groups** tab.

5. To assign a group to a user switch to the **Users** tab and select the required user from the list.

# Users

6. On the user's detail page, click on **Edit**, and select the appropriate group organization from the dropdown menu (marked with a **Group** tag), in the *Organization* field. Once the changes are saved, the user is assigned to the selected group.

# Editing an organization group

1. On the *Users* page, switch to the **Groups** tab and open the *Group Details* page by selecting a record on the groups list.

2. Click on **Edit** to update the group details.
