## **Group Management**

Group is another way of categorizing devices other than Hierarchies. The devices belonging to a group can also be assigned to a Hierarchy. **Groups** feature is used to perform operations on a specific group of devices. This feature allows you to configure **Groups**.

Follow the option sequence below to view groups on the landing page.

## **Verifone Central -> Device Management -> Hierarchy/Group Management -> Groups**

## Select Actions -> Edit Group Details
