

 $\frac{https://verifone.cloud/docs/device-management/device-management-user-guide/devices/alerts-and-notifications}{Updated:~07-Mar-2023}$ 

## **Alerts and Notifications**

The **Alerts** is a feature in Device Management to notify the user about an important event that occurred at the device or server level. The Alert Administration feature provides a summary of alerts. The severity of the alert is categorized as **Low**, **Medium**, and **High**. The severity of the alert is based on the requirement for notification.

Follow the option sequence below to view the Alerts landing page.

## **Verifone Central -> Device Management -> Alerts**
