

Add/Delete Parameters

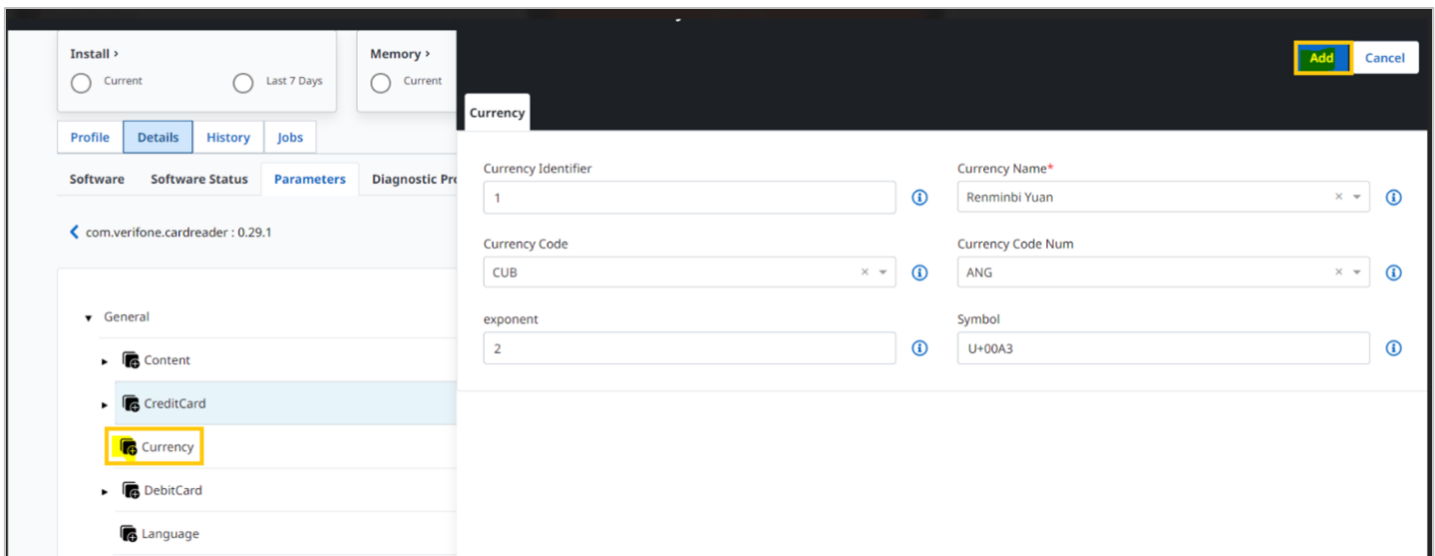

The **Parameter Management** feature provides the flexibility to add and delete parameters for basic as well as advanced parameters. A new instance can also be added and deleted.

Follow the option sequence below to add/delete parameters/instances.

Verifone Central -> Device Management -> Devices -> View Devices -> Device Details -> Details -> Parameters

Click the respective icon to add/delete parameter/instance.

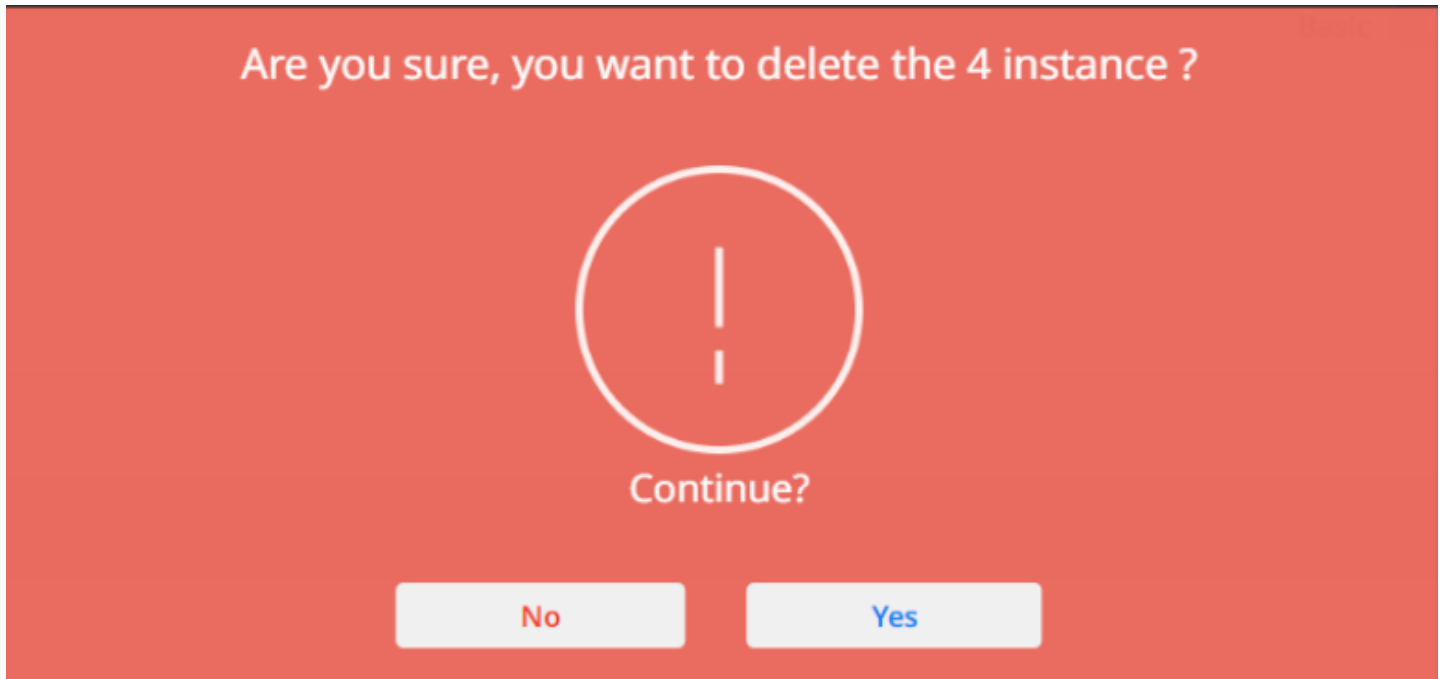

Enter the parameter details and click **Add** to add a parameter.

Updated: 09-Nov-2022

A confirmation popup message is displayed saying that the Parameters were added successfully.

A confirmation popup message is displayed before deleting the instance.
