

## Installation

Follow these steps to install the Magento 2 plugin:

1. Download the latest release from the [Verifone Payment Module table](#) at the bottom of this page and extract the archive.
2. Upload the included **Verifone** directory to 'app/code/' under your Magento root directory on your server.
3. Upload the files to your server, to your instance of Magento 2. Each file must be uploaded to the correct directory.

4. Install the module by running `'bin/magento setup:upgrade'` and `'bin/magento setup:di:compile'`.
5. Log in to your Magento 2 administration panel and navigate to *System* → *Cache management*.

6. On the **Cache management** page, click on the **Flush Magento cache** button.

7. Go back to the **System** tab and select **Index Management**.

The screenshot shows the Magento System tab interface. On the left sidebar, the 'SYSTEM' section is expanded, and 'Index Management' is highlighted with a red arrow. The main content area shows the 'Flush Cache Storage' section with a 'Flush Magento Cache' button. Below this, there is a table of cache tags.
