

## Installation

Follow these steps to install the Magento 2 plugin:

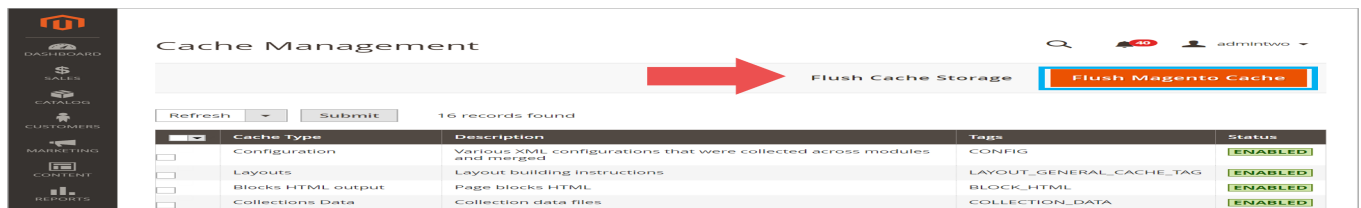

1. Download the latest release from the [Verifone Payment Module table](#) at the bottom of this page and extract the archive.
2. Upload the included **Verifone** directory to 'app/code/' under your Magento root directory on your server.
3. Upload the files to your server, to your instance of Magento 2. Each file must be uploaded to the correct directory.

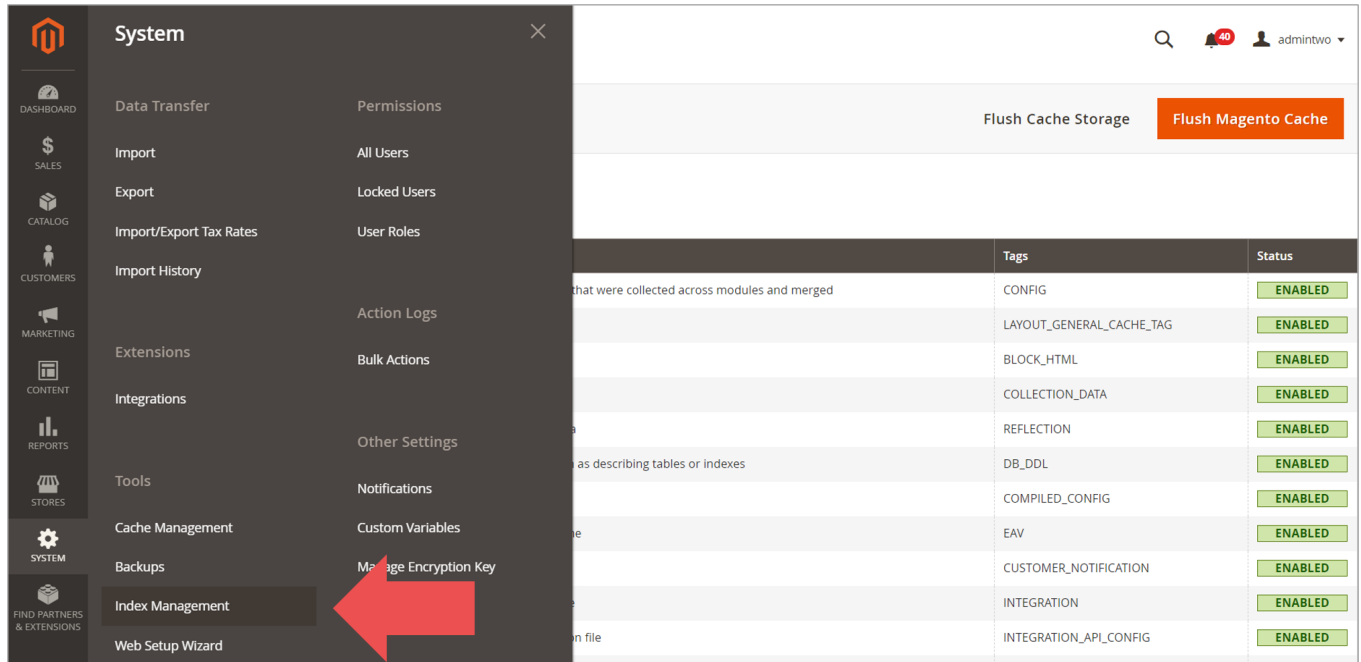

4. Install the module by running `bin/magento setup:upgrade` and `bin/magento setup:di:compile`.
5. Log in to your Magento 2 administration panel and navigate to *System* → *Cache management*.

6. On the **Cache management** page, click on the **Flush Magento cache** button.

7. Go back to the **System** tab and select **Index Management**.

The screenshot shows the Magento System configuration page. A red arrow points to the 'Index Management' option in the left-hand navigation menu. The main content area shows a 'Flush Cache Storage' section with a 'Flush Magento Cache' button, and a table of cache tags.
