What's New In Release Date: May 20, 2024 (R33)

Replicate Configuration

The ability to replicate configurations (tax rates, Fees, ID Checks etc.) from one site to multiple sites has been added.

What's New In Release Date: April 15, 2024 (R32)

Accounts

Partner Accounts

Petro Partner Accounts are supported to get the T-Log data via an API from C-Site Management.

What's New In Release Date: February 26, 2024

Accounts

1. An account can now have multiple Petro Site Admins and/or Major Oil Admins.
2. Petro Site Admins now have permissions for Access Control and Forecourt meaning that all the forms are accessible for Read and Write.

Administration Hierarchy

When a user expanded the tree structure in the Administration Hierarchy, it took longer than expected to open. An enhancement was made to speed up the page load.

Enterprise Level

1. The user is now able to perform both row-based and table-based operations on the enterprise-level data so that they can easily manage the configurations.
2. The user is now able to create a new Enterprise Configuration from the Enterprise view on the C-Site Management landing page.

Loyalty Site Configuration

The user is now able to edit the Loyalty Site Configurations by directly clicking on a field to edit, rather than needing to click on an Edit button first.

Proprietary + Confidential. © Verifone Inc. All rights reserved.

Site Assets

Site ID is now included as part of the Site Assets Page (Requires Commander software release 55.01).

What's New In Release Date: January 16, 2024

Software Versions

The releases (bases) will now be mapped to the forms.

Login/Logout

The ability to send POS screen Login/Logout messages was added. (Requires Commander software release 55.00)

Sales Configuration

The ability to send the Sales Configuration was added. (Requires Commander software release 55.00)

Cloud Configuration Manager

1. The ability to send fuel prices and read only fuel configuration was added. (Requires Commander software release 55.00)
2. The ability to edit and send the item prices from C-Site Management was added. (Requires Commander software release 55.00)

Loyalty

The ability to give the ownership of the loyalty program from Branded oil to Merchant and vice versa and the ability to remove the loyalty program from C-Site Management were added.

What's New In Release Date: November 15, 2023

Release Version

The Release Version will now be displayed on a form in the Configuration > Site Configuration.

Login Link

A link to the login page was added to the self-registration page.

Proprietary + Confidential. © Verifone Inc. All rights reserved.

Loyalty Configuration

Loyalty configuration is supported based on the ownership of the program. It requires Release 54.02 version.

Site Creation

If a site does not exist in Verifone C-Site Management during Verifone Commander Onboarding, it will automatically be created.

T-Log Viewer

When the user clicks on the T-Log Viewer in Verifone C-Site Management, the Financial filter is now used by default. Journal or Other are additional filter options.

What's New In Release Date: September 27, 2023

Loyalty

Major Oil Brands can now access the Loyalty Configuration.

POS Configuration

1. The user can now view and send fuel tax exempt and receipt lines data from C-Site Management to the Verifone Commander. This change requires Release 54.01 or higher.
2. The user can now view and send POS security data from C-Site Management to the Verifone Commander. This change requires Release 54.02 or higher.

What's New In Release Date: August 16, 2023

T-Log Viewer

1. T-Log Viewer can now be viewed with one service ID at a time.
2. The T-Log data is now exported in the CSV format.

System

1. The status of the Verifone Commander will update after a connection is restored. It was added in the Verifone Commander Release 54.00.00 software.
2. The Terms and conditions have been changed. The admin must accept site solutions before proceeding with C-Site Management.
3. Last heartbeat will be displayed in Administration > Sites and will not be shown to all onboarded sites.

Proprietary + Confidential. © Verifone Inc. All rights reserved.

POS Configuration

The following the forms have been added to configure the store operation from C-Site Management using Verifone Commander Release 54.01.00 software:

- Tax Rates
- Categories
- Department
- ID Checks
- Blue Laws
- MOP
- Fees
- Currencies

Loyalty

The Loyalty Configuration can now be sent to multiple sites from C-site Management. It was added in the Verifone Commander Release 54.00.00 software.

Site Assets

Vendor name was added as part of the column for the site asset reporting.

Mobile Payment Configuration

1. The Acknowledgment status of the configuration has been added in the Site Configuration. This was added in the Verifone Commander Release 54.00.00 software.
2. The ability has been added to bulk upload of Service ID and Merchant ID numbers for Mobile Payment Configuration.
3. The ability to configure Mobile Payment Configuration for one or more sites and send from C-site management has been added. It is available to Major oil and Retailer and was added in the Verifone Commander Release 53.41.00 software.
