

Cash Rounding

Feature Reference

Date: February 17, 2026

Cash Rounding

Using this Feature Reference

This Feature Reference provides detailed information on how to configure and use the cash rounding feature on the Verifone Commander.

This document contains the following subsections:

- **Overview** - This section contains a brief description, requirements and the supported hardware configurations for the feature on Verifone Commander.
- **Using** - This section describes how to prepare Verifone Commander for the feature.
- **Configuring** - This section contains information on how to configure the feature on Verifone Commander.
- **Reporting** - This section contains a sample report with a detailed report description for the feature on Verifone Commander.

OVERVIEW

Feature Description

With the discontinuation of the U.S. penny, all cash transactions can be rounded to the nearest five cent increment. Our POS system, billing, and reporting systems will properly handle rounding, eliminate penny references, and remain compliant with the new standards.

The following System Properties can be configured:

- `cash.rounding.enabled` = true or false
- `cash.rounding.strategy` = NEAREST, UP, or DOWN
- `cash.rounding.adjustment` = 0.05, 0.10, or 1.00

If no values or incorrect values are entered, the system will use the default values (false, NEAREST, and 0.05).

Cash rounding occurs only for cash transactions and applies after taxes, fees, and discounts have been calculated.

Note:

- Round down benefits the customer. Refund of a round down transaction also benefits the customer. See sample refund receipt in the document.
- Round up benefits the site. Refund of a round up transaction also benefits the site. See sample refund receipt in the document.
- Round nearest tends to even out transactions
- Check with local laws and regulations to ensure the round policy chosen complies

Requirements

Supported Hardware Configurations

- Verifone Commander with C18

Software Requirements

- Verifone Commander Release 55.02.08 and above

CONFIGURATION

System Properties

Go to **Configuration Client > Initial Setup > System Properties**

System Properties

System Property

Name:

Value:

```

allow.concurrent.scanner = 'yes'
allow.sco.fuelPrepay = 'no'
auto.printPd.report = 'no'
cash.rounding.adjustment = '0.05'
cash.rounding.enabled = 'true'
cash.rounding.strategy = 'NEAREST'
DailyMsg.poll.interval = '0'
DailyMsg.scroll.interval = '5'

```

Use the following system properties to enable cash rounding, set the value to round to, such as 0.05, and how to round transactions, such as NEAREST.

Property	Values	Default	Description
cash.rounding.adjustment	0.05, 0.10, 0.25 1.00	0.05	Rounding adjustment amount
cash.rounding.enabled	true, false	false	Master switch for cash rounding feature
cash.rounding.strategy	NEAREST, DOWN UP,	NEAREST	Rounding strategy to apply

If no values or incorrect values are entered, the system will use the default values (false, NEAREST, and 0.05).

Round to Nearest (NEAREST strategy)

This strategy rounds the cash transaction up or down to the nearest rounding value defined in system properties (for example 0.05 or 5 cents).

Calculate the remainder when dividing the amount by 5 cents

If remainder is 0: Amount is already on nickel boundary, return unchanged

If the remainder is 1 or 2 cents: Round down to the lower nickel boundary

If the remainder is 3 or 4 cents: Round up to the higher nickel boundary

Examples

\$10.01 -> \$10.00 (remainder 1, round down by 1 cent)

\$10.02 -> \$10.00 (remainder 2, round down by 2 cents)

\$10.03 -> \$10.05 (remainder 3, round up by 2 cents)

\$10.04 -> \$10.05 (remainder 4, round up by 1 cent)

\$10.05 -> \$10.05 (remainder 0, return unchanged)

\$10.06 -> \$10.05 (remainder 1, round down by 1 cent)

\$10.07 -> \$10.05 (remainder 2, round down by 2 cents)

\$10.08 -> \$10.10 (remainder 3, round up by 2 cents)

\$10.09 -> \$10.10 (remainder 4, round up by 1 cent)

Round Down (DOWN strategy)

This Strategy will round all cash transactions down to the rounded value defined in system properties (for example 0.05 or 5 cents).

Calculate the remainder when dividing the amount by 5 cents

If remainder is 0: Amount is already on nickel boundary, return unchanged

If the remainder is non-zero: Subtract the remainder to reach the lower nickel boundary

Examples

\$10.01 -> \$10.00 (subtract 1 cent)

\$10.02 -> \$10.00 (subtract 2 cents)

\$10.03 -> \$10.00 (subtract 3 cents)

\$10.04 -> \$10.00 (subtract 4 cents)

Round Up (UP strategy)

This Strategy will round all cash transactions up to the rounded value defined in system properties (for example 0.05 or 5 cents).

Calculate the remainder when dividing the amount by 5 cents

If remainder is 0: Amount is already on nickel boundary, return unchanged

If remainder is non-zero: Add the difference needed to reach the next nickel boundary

Adjustment amount: (5 - remainder) cents

Examples

\$10.01 -> \$10.05 (add 4 cents)

\$10.02 -> \$10.05 (add 3 cents)

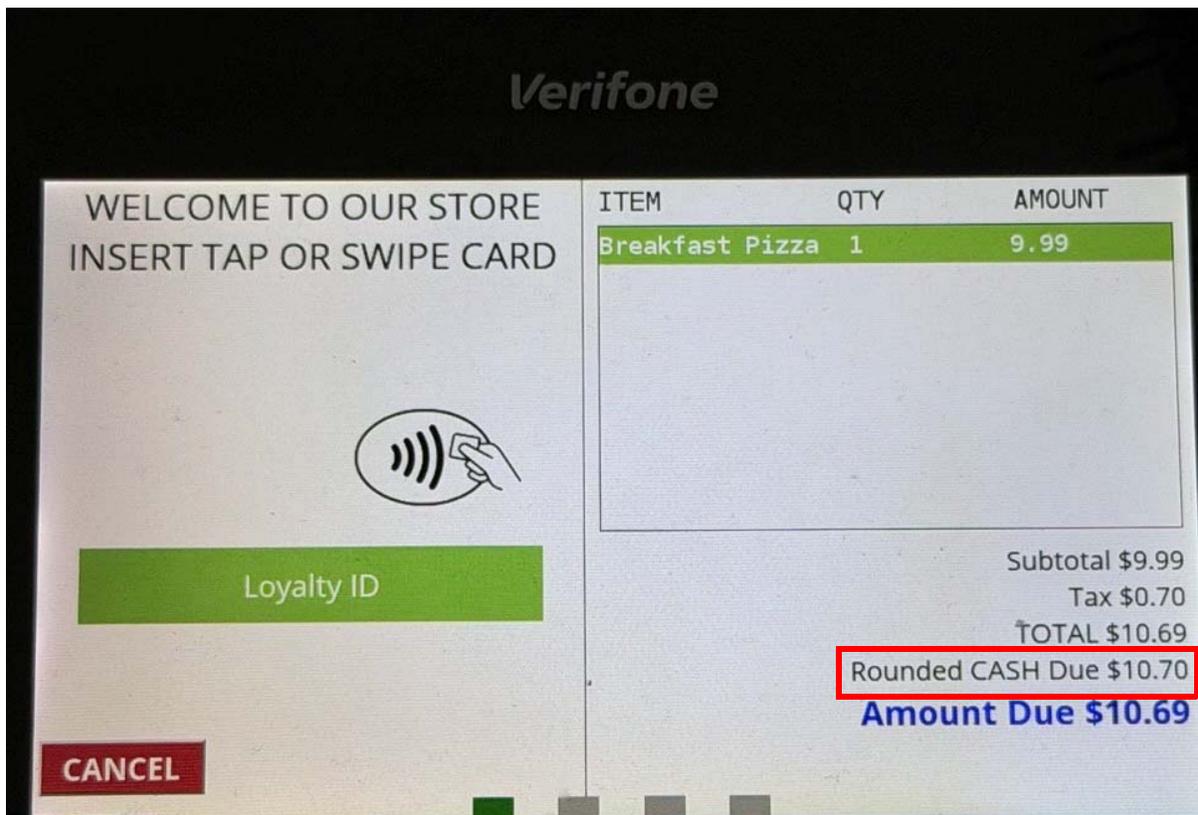

\$10.03 -> \$10.05 (add 2 cents)

\$10.04 -> \$10.05 (add 1 cent)

DISPLAY AND RECEIPTS

PIN Pad Display

A new Rounded CASH Due line is listed to show what the amount will be for cash customers. Non-cash paying customers will continue to pay the exact amount due that's listed below it.

POS Display

POS receipt window displays a line showing the cashier the rounded cash due amount for customers that pay with cash. After the transaction is finalized, the rounding adjustment line is displayed showing how much was added or subtracted to get to the rounded amount due.

Only rounded amounts are allowed to be tendered with cash. If the cashier tries to enter a non-rounded amount (e.g. 10.69), they will get an invalid amount error.

Rounded Cash Due Line

Description	Qty	Amount
Breakfast Pizza	1	9.99
Subtotal		\$9.99
Tax		\$0.70
TOTAL		\$10.69
Rounded CASH Due		\$10.70
Amount Due		\$10.69

Split Tender Transaction with Rounding Adjustment

Description	Qty	Amount
House Chips	1	1.29
Subtotal		\$5.16
Tax		\$0.36
TOTAL		\$5.52
CASH		\$2.00
CREDIT		\$2.00
CASH		\$1.50
Rounding Adjustment		\$0.02
Amount Due		\$0.00

Change with Rounding Adjustment

Description	Qty	Amount
House Chips	1	1.29
House Chips	1	1.29
Subtotal		\$2.58
Tax		\$0.18
TOTAL		\$2.76
CASH		\$5.00
Rounding Adjustment		\$0.01
Change		\$-2.25

SCO Display

SCO will show the rounded cash due line for customers that choose to pay with cash at checkout.

The screenshot shows the SCO interface with a top navigation bar containing 'Grab n Go', 'Ice', 'Chicken', 'Car Wash', and 'Help'. Below this is a grid of product categories: Fountain Drinks, Coffee, Grill, Fresh Bakery, and Fruit. A shopping cart on the right contains a 'Hot Dog' for 1.49. The bottom right section displays a summary table:

Tax	\$0.10
TOTAL	\$1.59
Rounded CASH Due	\$1.60
Amount Due	\$1.59

A blue 'Checkout' button is located below the summary table.

Receipts

Rounded cash receipts will show the rounding adjustment on a separate line so that the cash tendered plus the adjustment will equal the total.
