## Important Information

### Verifone Commander Release 56.02.00

Changes were made in the NAXML Full Station Data/Station Sales Data reports. These reports earlier used the Department report exclusively to calculate the station totals. However, they are now augmented with the Loyalty Report to get a more accurate total. There were no changes made to the Department Report.

Also, in Verifone Commander Release 56.02.00, the discount totals were incorrect in the Network Product Report. This was corrected.

### This Version

This is a new version of the Report Navigator. It has been re-written to use the Microsoft .Net Framework. It is compatible with all the latest Microsoft Operating Systems.

## System Requirements

- Microsoft Windows 10 or later
- Microsoft Windows Server 2016 or later
- .Net Framework 4.8 - All versions of Windows that have been kept up-to-date should already have it installed. If not, then download and install prior to installing the Event Manager. The .Net Framework 4.8 is available at <https://dotnet.microsoft.com/en-us/download/dotnet-framework/net48>

## What's New In Release Version: 3.0.9.2

### ENHANCEMENT

#### SMTCommon 1.0.5.1

Improvements were made in the handling of all-user versus single user installations and shared data versus private data options.

## RESOLUTION

### Application

The indoor and outdoor mobile transactions were displayed incorrectly in the Report Navigator End Of Day Report. Also, the food stamp transaction count and amount were displayed incorrectly in the Report Navigator End Of Day Report.

## What's New In Release Version: 3.0.8.5

### ENHANCEMENT

When installed for All Users (requires Admin privilege), options are added to the main screen to allow changing the application from using private data folders to using shared folders. With shared folders, all users of a system will share the same information.

## What's New In Release Version: 3.0.8.2

### ENHANCEMENT

As part of the Mobile QR code functionality, the following was added:

- One new column "OverAge" was added to the Age Verification Report. "OverAge" will be printed only for Mobile QR code transactions and will be blank for non-Mobile QR code transactions.
- The text "Mobile" was added as an Entry Method for Mobile QR code transactions.

## RESOLUTION

Cashier number was not printed in the PLU Exception Report. This was corrected.

## What's New In Release Version: 3.0.8.1

### ENHANCEMENT

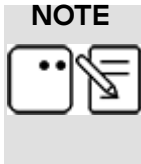

The "LOYALTY REPORT" name was changed to "Loyalty Discount Report."

## What's New In Release Version: 3.0.7.4

### ENHANCEMENTS

Changes were added to support special characters in fields: Site ID, Location ID, and Period ID.

#### NOTE

Special characters that are not allowed in folder/file names are replaced with underscore(\_) character. Also, the Common.dll file was updated, but none of the changes affected the Report Navigator.

### RESOLUTIONS

The following issues were corrected:

- Several issues related to offline reports
- Report Cache Management dialog was not displaying group reports
- Some group reports were selecting and displaying an incorrect date and time period in the report output

## What's New In Release Version: 3.0.6.1

### ENHANCEMENTS

The following four XSL files to support displaying Paid Order over/under amounts in MOP Totals Report were modified:

- vfit/periodTargs/cashierPd/tr\_cashierPd.xsl
- vfit/periodTargs/summaryPd/tr\_Summary.xsl
- vfit/periodTargs/summaryPd/tr\_SummaryAllR.xsl
- vfit/periodTargs/summaryPd/tr\_SummaryC.xsl

## RESOLUTIONS

The following issues with Group Reports have been corrected:

- The final dialog before creating report was not allowing period selection.
- An incorrect index was being used to display time period in the report.

## What's New In Release Version: 3.0.5.1

## ENHANCEMENTS

The following five XSL files were modified to support MOP Totals and Over/Short for External Payment MOP in the End of Day (T-Log based) Report:

- vfit/transSet/tlogSet.xslt
- vfit/transSet/tlogSet-xalan.xslt
- vfit/tlog/buildSummary.xslt
- vfit/tlog/buildSummary-xalan.xslt
- vfit/periodTargs/summary2Pd/tr\_Summary.xml

## What's New In Release Version: 3.0.4.1

## RESOLUTIONS

MOPs were not displayed on End Of Day Report. The following three XSL files were modified:

- vfit\periodTargs\summary2Pd\tr\_summary.xml
- vfit\tlog\buildSummary.xslt
- vfit\tlog\buildSummary-xalan.xslt

## What's New In Release Version: 3.0.3.1

### RESOLUTION

An exception occurred in the Fuel Price Change Report. The tr\_FuelPriceChange.xml file was modified to comment out a misplaced attribute.

## What's New In Release Version: 3.0.2.1

### RESOLUTIONS

Fuel Price Change Report displayed zeros for amounts. The following six XSL files were modified:

- vfit/periodTargs/summary2Pd/tlogSet.xml
- vfit/periodTargs/summary2Pd/tlogSet-xalan.xml
- vfit/tlog/buildFuelSales.xml
- vfit/tlog/buildFuelSales-xalan.xml
- vfit/periodTargs/fuelPriceChange/tr\_fuelPriceChange.xml
- vfit/periodTargs/fuelPriceChange/tr\_fuelPriceChange-xalan.xml

## What's New In Release Version: 3.0.1.1

### ENHANCEMENT

This is the initial Release of the .Net version.
