# SAPPHIRE SITE CONTROLLER APPLICATION

The application that is running on the Sapphire can be obtained through Sapphire Configuration Manager, System Setup (Ruby), and on the front of the Sapphire.

• The application currently loaded on the Sapphire is displayed in the small green screen on the front of the Sapphire. In the example below, the site is running the Buypak application with software version 6.00.07.

- To access the application version at a **Ruby/Sapphire site from the Main Ruby** perform the following steps:
  - 1. Enter into System Setup
  - 2. Log into Maintenance
  - 3. Enter into Version Information
  - 4. The Application information will be displayed on the top line. In the example below, the site is running the Buypak application on software version 6.00.07.

- To access the application version in **Sapphire Configuration Manager** perform the following steps:
  - 1. Log into Sapphire Configuration Manager
  - 2. Click on Help
  - 3. Click on About
  - 4. The window below is a sample window of what will appear. The site is running the Buypak application on software version 5.04.16.

## **COMMANDER SITE CONTROLLER APPLICATION**

The Commander Application information can be obtained by checking the front of the Commander or through the Config. Client.

• The application currently loaded on the Commander is displayed in the small green screen on the front of the Commander. In the picture below, the site is loaded with the BP application and is running software version 1.00.00.

- To access the application information from the Config Client perform the following steps:
  - 1. Log into Config. Client
  - 2. Click on Help
  - 3. Select About.
  - 4. In the example below, the location is running the Buypass application with software version 1.01.06.
